Welcome to the TomTom BRIDGE

Welcome

This User Manual explains how to use the both the TomTom BRIDGE Terminal and the TomTom BRIDGE Hub as well as the installed TomTom apps. The User Manual has the following sections:

- <u>The TomTom BRIDGE</u>
- <u>The TomTom Navigation app</u>
- <u>The TomTom Camera app</u>
- <u>The TomTom Music app</u>

The two devices are fundamentally different in that the BRIDGE Terminal has its own integrated screen whereas the BRIDGE Hub uses an externally connected screen. Hence many settings described in this manual, such as screen brightness, do not apply to the Hub.

Also the BRIDGE Terminal must be charged using a dock whereas the BRIDGE Hub is powered directly from your vehicle's battery.

Important: For other settings and operation instructions for the TomTom BRIDGE, and for instructions about other apps installed on the TomTom BRIDGE, please refer to the applicable User Documentation.

The TomTom BRIDGE

About your TomTom BRIDGE Terminal

- 1. On/Off button.
- 2. Mounting slot.
- 3. Memory card slot.
- 4. Mount interface.
- 5. TomTom USB charging cable slot.
- 6. Locking port for a Kensington lock.

This alternative mounting option and other accessories are available here at tomtom.com/bridge.

Installing your TomTom BRIDGE Terminal in your vehicle

1. Choose a safe position to install your BRIDGE Terminal in your car or truck.

2. Attach the dock to a mounting bracket on the dashboard with 4 bolts.

Note: Mounting bracket and 4mm diameter bolts not included.

3. Connect the charging cable to the dock and to the power supply of your vehicle.

Tip: Charging your TomTom BRIDGE using your computer is not recommended. The USB connector on the dock can only be used to charge the device when connected to a wall socket.

4. To dock your device, place your device in the dock, making sure that it clicks into place.

5. To undock your device, remove your device from the dock by pushing the button on the top of the dock.

6. To charge your device outside the car, use a USB cable or the optional TomTom Charger for the BRIDGE.

Note: Do not use TomTom cables or accessories from other TomTom products to charge your device or this may damage your BRIDGE.

You can customise your device using the BRIDGE SDK and Navigation API. For more information see the BRIDGE Developers' Portal at <u>developer.tomtom.com/bridge</u>.

About your TomTom BRIDGE Hub

- 1. Open the front panel to access the BRIDGE Hub front interfaces.
 - A LED status indicator
 - B Reset button
 - C Micro USB port for diagnostics
 - D SD memory card slot
 - E Mini-SIM card (2FF) slot

Note: The available interfaces depend on the hardware configuration.

- 2. The TomTom BRIDGE Hub has the following interfaces on the back:
 - F External 4G-LTE Main antenna
 - G External 4G-LTE Aux antenna
 - H 16-pin connector for Power/CAN/Audio/Video
 - I HDMI port with locking screw
 - J HSA-USB port (host only)
 - K HSA-USB port (OTG)

L - External GPS antenna

Note: The available interfaces depend on the hardware configuration.

A range of accessories are available, including the following:

- Full cable harness, for example, external camera, CAN.
- CLA power cable.
- External antennas for 4G-LTE and GPS.

Visit the TomTom BRIDGE website for more information at tomtom.com/bridge

Installing your TomTom BRIDGE Hub in your vehicle

Important: Installation of the TomTom BRIDGE Hub should be carried out by a professional installer.

1. Mount the BRIDGE Hub on a flat surface in the vehicle using screws, adhesive strips or cable ties:

2. To dock the BRIDGE Hub, engage one side into the mount, then push in the other side.

3. To undock the BRIDGE Hub, use a flat tool to disengage one side of the device, then remove the device.

4. Use the supplied cable and connector to connect the BRIDGE Hub to the vehicle's wiring system. When the power is on, the status LED on the front interface shows the device status.

Acc	_	
Pwr		
Gnd		

5. When the status LED shows continuous green, the device is ready. Go to the BRIDGE Developer Portal for more information about the status LED.

- 6. Connect a screen in one of the following ways:
 - A Using HDMI for display and USB for touch.
 - B Using USB and the TomTom BRIDGE Hub Viewer app on the connected Android device.

For more information on the app, see the <u>TomTom BRIDGE Developer Portal</u>.

Charging the TomTom BRIDGE

TomTom BRIDGE Terminal

The battery in the TomTom BRIDGE Terminal charges when you install the device in its dock and the dock is powered or you charge using a USB cable connected to a wall socket.

You are warned when the battery level is low or critical. You lose your connection to the internet when the battery level is low or critical. When the battery is empty, the device goes into sleep mode.

If the battery level is very low when you switch on the device you will see a battery symbol on the screen. Charge your device for a few minutes then it will start automatically when it has enough power.

Note: Charging your TomTom BRIDGE using your computer is not recommended. The voltage output of computer USB ports vary by manufacturer.

TomTom BRIDGE Hub

The TomTom BRIDGE Hub is powered by your vehicle battery. Dependent on the settings set by your configurator, the TomTom BRIDGE Hub may be powered for a limited amount of time when the ignition is switched off.

Starting the TomTom BRIDGE

The TomTom BRIDGE Terminal starts when it is in its dock, and the dock has power. When the device is not in its dock, you can also press the On/Off button until the device starts.

The TomTom BRIDGE Hub starts when the ignition is switched on. You can see the home screen when the attached screen also has power.

The TomTom BRIDGE Terminal home screen is shown.

Note: The home screen shown below is an example. Your home screen may look different and have different apps installed. It may also vary depending on the screen you are using with your TomTom BRIDGE Hub.

1. An app running as a widget.

For example the <u>TomTom Navigation app</u> and the <u>External camera app</u> can run in a widget on the home screen. Select the widget to open the app.

Note: A widget is an app that runs in its own panel. You can select a widget to open the full app.

Tip: You can move and resize apps and widgets.

- 2. The <u>Music app</u> running as a widget.
- 3. Back button.

Select this button to return to the previous screen that was open.

4. Home button.

Select this button to return to the device home screen.

5. System bar.

You can add shortcuts for your favourite apps to this bar.

6. Software update button.

Shortcut button to open the Software update app. This app lets you update the TomTom BRIDGE to the latest software version.

7. Status bar.

Touch this area to show app notifications and the device status.

Using gestures

Note: Only applies to the TomTom BRIDGE Terminal.

You use gestures to control your device.

In this User Manual, you learn how to use gestures to control your TomTom BRIDGE. Below is an explanation of each gesture.

Touch one finger on the screen twice in rapid succession. Example of when to use this: Zooming in.

Put one finger on the screen and move it across the screen. Example of when to use this: Scrolling a screen.

Flick the tip of a single finger across the screen. Example of when to use this: Scrolling a big distance on the screen.

Press and hold

Put one finger on the screen for more than 0.5 second. Example of when to use this: Selecting a location on the map.

Pinch to zoom

Touch the screen with your thumb and a finger. Move them apart to zoom in or move them together to zoom out.

Example of when to use this: Zooming in and out on the screen.

Tap or select

Tap a single finger on the screen.

Example of when to use this: Selecting an item in a menu, or opening an item.

Apps on the TomTom BRIDGE

The TomTom BRIDGE is an Android based device that has different apps installed on it. Some of the apps will be standard Android apps, for example a browser, a clock and a photo-gallery. Specialised apps could be added by the device owner, and TomTom has also added apps.

Note: The TomTom BRIDGE might be secured to prevent you making changes.

You can find other apps on the device by scrolling to the right. To see all the apps on the device, select **All apps**.

You can also add up to two app quick-launch buttons to the device's <u>System bar</u> for apps you want to use often.

Privacy notices for apps

Each installed app has its own privacy notice. Open the Android Settings app then select **About your TomTom device**. Select **Legal information**, then select **Your information**. Select an app from the list to read about the function of the app, how the app uses your information, and how your personal data is managed.

Connecting the TomTom BRIDGE

About connecting the TomTom BRIDGE

The TomTom BRIDGE connects to the Internet so you can use the installed apps and access <u>TomTom services</u>.

The TomTom BRIDGE is connected in one of the following ways:

- With a permanent connection directly from the TomTom BRIDGE. The device is always connected - you don't have to do anything.
- With a <u>connection via your smartphone</u>. You must create a Personal Area Network to connect your smartphone to your TomTom BRIDGE.

Note: To update the TomTom BRIDGE software, use a <u>Wi-Fi connection</u>. **Note**: To update <u>maps</u>, we recommend that you use a <u>Wi-Fi connection</u>.

Smartphone connection

Using your smartphone to connect the TomTom BRIDGE to a network means that data is sent and received by your smartphone using your mobile services provider.

Your smartphone needs to be compatible with your TomTom BRIDGE, and you must have a data plan from a mobile services provider. Go to <u>tomtom.com/connect</u> for more information.

Important: You might have additional costs when you use your smartphone to connect your TomTom BRIDGE, especially if you are outside the area covered by your data plan. Check with your mobile services provider for more information.

Personal Area Networks

Smartphone-connected devices only

Your phone shares its internet connection by using the phone's Bluetooth® and Personal Area Network (PAN) functions.

Depending on your phone's Operating System, this network, or PAN, might be called one of the following names:

- Personal Hotspot
- Tethering or Bluetooth Tethering
- Tether or Bluetooth Tether

The PAN function is probably already in your phone's Operating System, or you can download an app to create a PAN.

Note: Some mobile service providers don't allow their users to use a PAN. If your phone doesn't have the PAN function, you should contact your service provider for more information.

Please check the user guide for your phone if you are having trouble finding the settings.

For more help, go to tomtom.com/connect.

Connect using Bluetooth

To connect your TomTom BRIDGE to your smartphone using Bluetooth, do the following:

- 1. Switch on Bluetooth tethering or personal hotspot on your phone, and make sure your phone is discoverable.
- 2. Press the Home button on your TomTom BRIDGE.
- 3. Select the **Settings** app.
- 4. Switch on Bluetooth.
- 5. Select Bluetooth, then select SEARCH FOR DEVICES.

The TomTom BRIDGE searches for your phone and shows it as an available device.

Tip: If your TomTom BRIDGE cannot find your phone, make sure your phone is still 'discoverable' or 'visible' for other Bluetooth devices.

- 6. Select your phone from the list of available devices.
- 7. After you have connected your TomTom BRIDGE to your smartphone, you need to check the box in the Bluetooth profile on the TomTom BRIDGE to enable internet access as shown below.

← Bluetooth		1

$\langle \bigcirc \bigcirc () $		◀ ♥ ☀ ◢ 🛔 16:45 ∧

Your TomTom BRIDGE connects to TomTom services using your phone's internet connection. TomTom services are now active.

The Bluetooth symbol in the Android Status Bar shows that Bluetooth is switched on.

Reconnecting your smartphone

You do not need to do anything to reconnect your TomTom BRIDGE to your phone.

Your TomTom BRIDGE will remember your phone and will find it automatically when you have Bluetooth tethering switched on and you are in range of your device. If you have a valid TomTom services subscription, the service starts automatically.

On the TomTom BRIDGE Status bar, check that the TomTom BRIDGE is connected to the internet.

If you want to connect using another phone, you must <u>connect using Bluetooth</u> for that phone.

Tip: If reconnecting automatically to your smartphone using Bluetooth doesn't work, you can manually reconnect as described in <u>Connect using Bluetooth</u>.

Unable to get a connection

If your TomTom BRIDGE cannot connect to your phone, or you have no internet connection, check the following:

- Your phone is shown on your TomTom BRIDGE.
- Your phone's Bluetooth tethering or Portable Wi-Fi hotspot is switched on.
- Your data plan with your mobile services provider is active, and you can access the internet on your phone.

Features on the TomTom BRIDGE

The TomTom BRIDGE uses the Android operating system. TomTom and the device owner have changed the operating system in the following ways:

- Certain Android features have been disabled, either by TomTom or by the device owner. This
 makes the device safer and easier to use while driving.
- Some new features and apps have been added, both by TomTom and by the device owner.
 These additions customise the device so it is relevant for the functions it will be used for.

The features added by TomTom are as follows:

Important: For other settings and operation instructions for the TomTom BRIDGE, and for instructions about other apps installed on the TomTom BRIDGE, please refer to the applicable User Documentation.

Sleep settings

Note: Only applies to the TomTom BRIDGE Terminal.

You can choose when your TomTom BRIDGE goes to sleep if no apps are running or when it is removed from its dock.

Open **Display** in the Android **Settings** app to see the following settings:

Sleep

Sets the delay time before your TomTom BRIDGE goes to sleep if no apps are running.

Stay awake when docked

Keeps your TomTom BRIDGE awake while it is docked and there is power.

Sleep automatically when disconnecting from power

Puts your TomTom BRIDGE to sleep when power is removed either from the dock or directly from the TomTom BRIDGE.

Memory card slot

You can use a memory card to access your personal files, for example photos or music files.

TomTom Bridge Terminal

The memory card slot is located on the bottom of the device.

TomTom Bridge Hub

The memory card slot is located on the bottom of the device under a cover as shown below.

Transferring files to your device

You can transfer personal files, for example POI lists, photos or music files, to the TomTom BRIDGE internal memory. This allows you to use apps on the device to view POIs, photos or play music.

You can also transfer files from the TomTom BRIDGE internal memory to your computer.

Note: Not all file types can be opened by the device.

Note: You can transfer files from a computer running one of the following operating systems:

- Windows 7 or higher
- Apple OS X 10.5 or higher
- Some Linux distributions of version 14.04 or higher.

To transfer files, do the following steps:

1. For the TomTom BRIDGE Terminal, connect the device to your computer using a USB cable, then switch your TomTom BRIDGE on.

Note: You cannot use the mount to connect your device to your computer.

Note: You should plug the USB cable directly into a USB port on your computer and not into a USB hub or USB port on a keyboard or monitor.

For the TomTom BRIDGE Hub, use the black USB port and a USB cable to connect the device to your computer. This is port K shown here: <u>About your TomTom BRIDGE Hub</u>.

2. On your computer, open a file manager program.

Your TomTom BRIDGE appears in your computer's files system as TomTom Bridge.

- 3. Open the TomTom BRIDGE Internal Storage folder.
- 4. Copy files from your computer to a folder on your TomTom BRIDGE, or from your TomTom BRIDGE to your computer.

Tip: To keep the device organised, copy the files to a folder with a relevant name. For example, copy your music files to the Music folder.

5. Disconnect the TomTom BRIDGE from your computer.

Tip: You can remove all the files you copied to the TomTom BRIDGE by <u>clearing your personal</u> <u>data</u>.

System bar

The System bar is at the bottom of the screen and it contains quick-launch buttons, for example the Back and Home buttons. You can add up to two extra buttons to this bar to quickly start apps that you often use or to add easy access to the Power menu if you are using a TomTom BRIDGE Hub.

Tip: Some apps have a full screen setting that hides the system bar when the app is open.

To add a quick-launch button for an app, do the following:

- 1. Select the Home button.
- 2. Select the **Settings** app.
- 3. In Settings, select **System bar**.
- 4. Under Quick Launch Buttons, select Assign app.
- 5. Select an app from the list to assign to a quick-launch button.
- 6. Select the Home button.

Your new quick-launch button is added to the System bar.

To remove a quick-launch button, do the following:

- 1. Select the Home button.
- 2. Select the Settings app.
- 3. In Settings, select System bar.
- 4. Under Quick Launch Buttons, select and hold the button you want to remove.
- 5. In the pop-up box that appears, select **OK** to remove the quick-launch button.
- 6. Select the Home button.

The quick-launch button is removed from the System bar.

Volume control

The volume control is part of the system bar.

Select and slide the volume control to change the volume of voice instructions and warnings. If the voice instructions are switched off, the volume control will still change the volume of the warnings.

Updating the software

The TomTom BRIDGE owner will periodically release new software updates.

Tip: When a software update is available, a notification appears in the Notification bar. Select the bottom right corner of the device screen to open the Notification area.

Depending on the choices made by the device owner during configuration, you can update the TomTom BRIDGE in the following ways:

- SD memory card If configured by the device owner, insert the SD card and run the Software update app.
- Mobile network If configured by the device owner, run the Software update app and choose the mobile network option.
- External storage If configured by the device owner, attach a USB drive and run the Software update app.
- Wi-Fi network Follow the instructions below.

Updating using Wi-Fi®

When you have access to a Wi-Fi® connection, you can update the software using the **Software update** app. Large updates are downloaded in the background when the TomTom BRIDGE is connected to Wi-Fi. When the Wi-Fi connection is lost, downloading will pause. When the download is complete you will be prompted to install the update.

Note: Software updates can only be downloaded using a Wi-Fi connection.

To update the software on the device, do the following:

- 1. Select the Home button.
- 2. Select the **Settings** app.
- 3. In Wireless and networks, select **Wi-Fi**. Select and connect to a Wi-Fi network.
- 4. Select the Home button.
- 5. Select the **Software update** app.

Your device automatically downloads and installs the software update.

Note: You may have to restart the device to install the software update.

Moving and resizing apps and widgets

You can move apps and widgets to different places on the display. For example, if you often use the <u>External Camera</u> app, you can move it to the home screen. You can change the size of an app button or a widget to make it easier to use or see.

Note: The TomTom BRIDGE might be secured to prevent you making changes.

Moving apps and widgets

To move an app or widget, do the following:

 Select and hold the app or widget that you want to move. The app or widget changes colour. **Tip**: If you want to move an app or widget to the home screen, you might first have to move an app or widget from the home screen to make space for it.

Settings	Music		Browser
O liculator	Gallery	App Store Trial	All apps
+ -		(***)	
< 0 ()			

- Drag the app or widget to the edge of the screen.
 A white line appears on the edge of the screen to indicate that the adjacent screen will open.
- Drag the app or widget further and drop it in the empty space.
 An available space is highlighted a different colour when the app or widget is dragged over it.

Tip: You can only move an app or widget to an empty space.

Resizing apps and widgets

To resize an app or widget, do the following:

Note: Some widgets and apps have a size limit in one or more directions.

 Select and hold the app or widget that you want to resize for 2 seconds, then release. The app or widget changes colour and you see a waste bin icon and four resize spots.

2. Select and drag a resize spot to make the app or widget larger or smaller.

Tip: The shape you choose for the app or widget depends on the information you want to see. For example, you might choose to make the External Camera widget the size of half the display to make the camera image easier to see.

Deleting an app or widget

To delete an app or widget from the home or apps screen, do the following:

- Select and hold the app or widget that you want to delete for 2 seconds, then release. The app or widget changes colour and you see a waste bin icon and four resize spots..
- 2. Select the waste bin icon.

The app or widget is removed from the home or app screen and placed in the **All apps** location.

Tip: If you deleted the app or widget by mistake, open All apps and move it back again.

Sending information to TomTom

When you first start the TomTom BRIDGE or you have reset the TomTom BRIDGE, you are informed about how TomTom uses your information. This information includes your location, how you use the services and information you enter. We learn how you use the device so we can continually improve.

Go to the **Your information** app in the All apps menu to read about how TomTom uses your information.

If you think that your information is not being used for the purpose for which you have provided it to TomTom, contact us at <u>tomtom.com/support</u>.

You can find current and more detailed information at tomtom.com/privacy.

Clearing personal data

The TomTom BRIDGE stores your personal data as you use the apps installed on the device. All photos and music you have <u>transferred to the device</u> is also personal data.

If you have finished using the device it is a good idea to clear your personal data before you pass the device back to the owner.

To clear your personal data, do the following steps:

Note: Software updates can only be downloaded using a Wi-Fi connection.

- 1. If you are using a personal memory card, remove the memory card from its slot.
- 2. Select the **Settings** app.
- 3. Select Reset.
- 4. Select Clear personal data.
- Select Clear, then select Clear again.
 Your device automatically switches off and clears your personal data.

Taking a screenshot

If you need to make a picture of the screen of the TomTom BRIDGE, for example to show the owner an error that has occurred, do the following:

TomTom BRIDGE Terminal

- 1. Press and hold the On/Off button until the pop-up menu is shown.
- 2. Select **Take a screenshot** from the pop-up menu.

A screenshot is taken of the screen behind the pop-up menu.

Tip: Open the **Gallery** app on your TomTom BRIDGE to view the screenshots you have made.

3. Connect your TomTom BRIDGE to your computer and <u>transfer</u> the screenshots. The screenshots are in the pictures folder in the TomTom BRIDGE Internal Storage.

TomTom BRIDGE Hub

- 1. Add the power menu button to the system bar.
- 2. Select the power menu button on the system bar.
- 3. Select **Take a screenshot** from the pop-up menu.

A screenshot is taken of the screen behind the pop-up menu.

Tip: Open the **Gallery** app on your TomTom BRIDGE to view the screenshots you have made.

 Connect your TomTom BRIDGE to your computer and <u>transfer</u> the screenshots. The screenshots are in the pictures folder in the TomTom BRIDGE Internal Storage.

Language

The language used on the TomTom BRIDGE is also used on the apps installed on the device.

To change the device language, do the following:

- 1. Select the Home button.
- 2. Select the **Settings** app.
- 3. Select Language & input, then select Language.
- 4. Select the language you want, then select OK. Your device language changes.

The TomTom BRIDGE is not starting

In rare cases, your TomTom BRIDGE may not start correctly or may stop responding.

TomTom Bridge Terminal

First, check that the battery is charged. To charge the battery, connect your device to power or install it in the dock. It can take up to 3 hours to fully charge the battery.

If this does not solve the problem, you can reset the device. To do this, press and hold the On/Off button until your device begins to restart.

TomTom Bridge Hub

If your device doesn't start, turn the vehicle ignition off and then back on again. If that doesn't solve the problem, contact the administrator for your device.

Caring for your TomTom BRIDGE

It is important to take care of your device. Please follow the instructions below:

TomTom BRIDGE Terminal

- Except for using the SIM card slot, do not open the casing of your device under any circumstances. Doing so may be dangerous and will invalidate the warranty.
- Wipe or dry the screen of your device using a soft cloth. Do not use any liquid cleaners.

TomTom BRIDGE Hub

- The TomTom BRIDGE device must be used within the recommended operating temperature ranges only.
- The device housing must not be compromised or damaged, please use the recommended mounting interfaces as stated in the instruction manual.
- Wipe or dry the device using a soft cloth. Do not use any liquid cleaners.
- The device is resistant to dust and dripping water (IP52) if stored, used and mounted correctly.
- Do not immerse in water or use the device outdoors.
- Failure to follow these instructions may impact the device performance and useful lifetime.

Online User Manual

When you have access to a Wi-Fi connection, you can open the User Manual for your TomTom BRIDGE on the device. The language of the User Manual is the same as the language you selected in your device settings.

The Online User Manual button is on the Home screen or the All apps screen.

If the manual is not available in your device language, the English-language version is opened.

You can change the device language in **Language & input** in the TomTom BRIDGE Settings app. You can also download the User Manual in all available languages from <u>tomtom.com/support</u>.

Getting help

You can get further help by going to tomtom.com/support.

For warranty and privacy information, go to tomtom.com/legal.

TomTom Navigation App

Welcome to navigation with TomTom

This Section explains how you use the TomTom Navigation app.

Important: For other settings and operation instructions for the TomTom BRIDGE, and for instructions about other apps installed on the TomTom BRIDGE, please refer to the applicable User Documentation.

The navigation app is installed on the device, either as an app that you have to open, or as a software widget on the Home screen. The widget has some limited functionality, for example you can see your route and route instructions on the widget, but you can't plan a route.

Select the widget to open the full navigation app to use all the navigation features.

For information about what you see in the navigation app, go to:

- TomTom Services
- What's on the screen
- Using gestures
- Main Menu

About TomTom services

TomTom services give you real-time information about <u>traffic</u> and <u>speed cameras</u> or <u>danger zones</u> on your route. To help you avoid traffic delays and get to your destination quicker, you can use TomTom services even on the routes you drive every day.

To get TomTom Services on your TomTom BRIDGE, <u>connect</u> your TomTom BRIDGE to a network.

Note: TomTom services are not available in all countries or regions, and not all services are available in all countries or regions. For more information on available services in each region, go to <u>tomtom.com/services</u>.

GPS reception

When you first start the navigation app, it may need a few minutes to find your GPS position and show your current location on the map. Make sure you have GPS activated on your device.

Tip: The GPS settings are in the device's **Settings** app.

In areas where GPS reception is not possible, such as tunnels, your location may not be accurate.

Important: The navigation app cannot give you route instructions until it has received location data.

What's on the TomTom Navigation app screen

The map view

The map view is shown when you have no planned route. Your actual location is shown as soon as your TomTom BRIDGE has found your GPS location.

You can use map view in the same way as you might look at a traditional paper map. You can move around the map using gestures, and zoom using the zoom buttons.

Important: Everything on the map is interactive including the route and the map symbols - try selecting something and see what it does!

Tip: To open a pop-up menu for an item on the map, for example a route or a POI, select the item to open the menu. To select a location on the map, select and hold the location until the pop-up menu opens.

The map shows your current location and many other locations such as your My Places locations.

If you have not planned a route the map is zoomed out to show the area around your location.

If you have planned a route, your complete route is shown on the map. You can <u>add stops</u> to your route directly from the map. When you start to drive, the guidance view is shown.

1. Back button. This button returns the map to an overview of your whole route or, if no route is planned, moves the map to put your current location at the centre.

- 2. Switch view button. Select the switch view button to change between the map view and the guidance view. When in map view, if you are driving, the small arrow rotates to indicate your direction of travel relative to north, with north being up.
- 3. Zoom buttons. Select the zoom buttons to zoom in and out.
- 4. Current location. This symbol shows your current location. Select it to add it to My Places or search near your current location.

Note: If your TomTom BRIDGE cannot find your location the symbol appears grey. Note: You cannot change the current location symbol.

- 5. Selected location. Press and hold to select a location on the map. Select the pop-up menu button to show options for the location, or select the Drive/Ride button to plan a route to the location.
- 6. Main Menu button. Select the button to open the Main Menu.
- 7. Map symbols. Symbols are used on the map to show your destination and your saved places:

Your destination.

Your home location. You can set your home location in My Places.

Your work location. You can set your work location in My Places.

When a search for POIs near destination is done and the results are shown on the

map, less important POIs are shown as black pins with white crosses.

Select a map symbol to open the pop-up menu, then select the menu button to see a list of actions you can take.

- 8. Traffic information. Select the traffic incident to display information about the traffic delay.
- 9. Your route, if you have planned a route. Select the route to clear it, change the route type, add a stop or save changes to your route.
- 10. Speed cameras or danger zones on your route. Select the speed camera or danger zone symbol to display more information.
- 11. Route bar. The route bar is shown when you have planned a route.

The guidance view

The guidance view is used to guide you along the route to your destination. The guidance view is shown when you start driving. You see your current location and details along your route, including 3D buildings in some cities.

The guidance view is normally in 3D. To show a 2D map with the map moving in your direction of travel, change the <u>2D and 3D default settings</u>.

Tip: When you have planned a route and the 3D guidance view is shown, select the switch view button to change to the <u>map view</u> and use the interactive features.

- 1. Switch view button. Select the switch view button to change between the map view and the guidance view.
- 2. Zoom buttons. Select the zoom buttons to zoom in and out.

Tip: On most devices you can also pinch to zoom in and out.

- 3. Instruction panel. This panel shows the following information:
 - The direction of your next turn.
 - The distance to your next turn.
 - The name of the next road on your route.
 - <u>Lane guidance</u> at some junctions.
- 4. Route symbols. Symbols are used on your route to show your starting location, your <u>stops</u>, and your destination.
- 5. Main Menu button. Select the button to show the Main Menu.
- 6. Speed panel. This panel shows the following information:
 - The speed limit at your location.
 - Your current speed. If you drive more than 5 km/h or 3 mph over the speed limit the speed panel turns red. If you drive less than 5 km/h or 3 mph over the speed limit the speed panel turns orange.
 - The name of the street you are driving on.
 - The speed camera or risk zone report button.

7. Current location. This symbol shows your current location. Select the symbol or the speed panel to open the quick menu.

Note: If your TomTom BRIDGE cannot find your location the symbol appears grey. **Note**: You cannot change the current location symbol.

8. Route bar. The <u>route bar</u> is shown when you have planned a route.

The route bar

The route bar is shown when you have planned a route. It has an arrival information panel at the top, and a bar with symbols underneath.

Tip: You can also choose to see a wider route bar showing additional route information (not available on all devices or apps).

Note: The distance ahead shown by the route bar depends on the overall length of your route.

The arrival information panel shows the following information:

Tip: If your destination is in a different time zone, you see a plus (+) or a minus (-) sign and the time difference in hours and half hours in the <u>arrival information panel</u>. The estimated time of arrival is the local time at your destination.

- The estimated time that you will arrive at your destination.
- The length of time to drive to the destination from your current location.
- A parking button is shown near the destination flag when parking is available near your destination.

If you have <u>stops</u> on your route, select this panel to change between information about the next stop and your final destination.

You can <u>choose the information you see</u> on the arrival information panel.

Traffic status - if your TomTom BRIDGE isn't receiving any traffic information, a symbol showing traffic with a cross appears underneath the arrival information panel.

The bar uses symbols to show the following information:

- A <u>faster route</u>, if there is traffic on your route.
- The <u>stops</u> on your route.

Tip: To quickly remove a stop, select it in the route bar and use the pop-up menu.

- <u>Petrol stations</u> that are directly on your route.
- <u>TomTom Traffic</u> incidents.
- TomTom <u>Speed Cameras</u> and <u>Danger Zones</u>.
- Rest stops directly on your route.

You can choose the information you see on your route.

The symbols are in the order that they occur on your route. For traffic incidents, the symbol for each incident alternates between showing the type of incident and the delay in minutes. Select a symbol to see more

information about a stop, an incident or a speed camera. If a symbol is shown on top of another symbol, selecting the symbols zooms in on the route bar to show each symbol separately. You can then select a symbol.

The total time delay due to traffic jams, weather, and other incidents on your route, including information provided from historical road usage, is shown above the symbols.

For a complete list of incident types, see <u>Traffic incidents</u>.

The bottom of the route bar represents your current location and shows the distance to the next incident on your route. In addition, you can choose to see the current time if you switch the setting on.

Note: To make the route bar more readable some incidents may not be shown. These incidents will always be of minor importance and only cause short delays.

The route bar also shows status messages, for example **Finding fastest route** or **Playing route preview**.

Distances and the route bar

The distance ahead shown on the route bar depends on the length of your route, or the distance remaining on your route.

For remaining distances longer than 50 km (31 miles), only the next 50 km (31 miles) is shown.
 The destination icon is not shown.

Tip: You can scroll the route bar to see your whole route (not available on iOS).

- For remaining distances between 10 km (6 miles) and 50 km (31 miles), the complete distance is shown. The destination icon is shown fixed at the top of the route bar.
- For remaining distances of less than 10 km (6 miles) the complete distance is shown. The destination icon moves down towards the chevron symbol as you get nearer to your destination.

The top half of the route bar shows twice the distance of the bottom half, as shown in the following examples:

- A remaining distance of 50 km on the route bar is split into 34 km (21 miles) at the top and 16 km (9 miles) at the bottom.
- A remaining distance of 10 km on the route bar is split into 6.6 km (4 miles) at the top and 3.3 km (2 miles) at the bottom.

The route bar is constantly updated as you drive.

The quick menu

To open the quick menu, select the current location symbol or the speed panel in the guidance view.

You can then do any of the following:

- <u>Report Speed Camera</u>, or <u>Report Risk Zone</u> (only applicable for France).
- Avoid a blocked road
- See your current location or your latitude/longitude if not on a named road.

Navigation buttons

On the <u>map view</u> or guidance view, select the Main Menu button to open the Main Menu.

The following navigation buttons are available in the Main Menu:

Search	Select this button to search for an address, a place or a Point of Interest, then <u>plan a route</u> to that location.
Add Home / Drive Home	Select this button to drive to your home location. If this button is not included in your main menu, go to <u>My Places</u> to set up your home location.
Drive to Work	Select this button to drive to your work location. If this button is not included in your main menu, go to <u>My Places</u> to set up your work location.
Recent Destination	Select this button to open the list of your recent destinations. Select a recent destination to plan a route to that destination.
Current route	Select this button to <u>clear or change</u> your planned route.
My Places	Select this button to show your <u>saved places</u> .
My Routes	Select this button to show your <u>saved routes</u> .
------------------------	--
Parking	Select this button to <u>find car parks</u> .
Petrol Station	Select this button to find petrol stations.
Report Speed Camera	Select this button to <u>report a speed camera</u> .
Start Recording	Select this button to start or stop recording a track.
Settings	Select this button to open the <u>Settings Menu</u> .

Main Menu smaller buttons and symbols

On the map or guidance view, select the Main Menu button to open the Main Menu.

The following buttons are available in the Main Menu screen, in addition to the navigation buttons:

?	Select this button to open the <u>Help Menu</u> . The Help Menu contains a guided tour and information about the navigation app.
	Select this button to reorder the buttons in the Main Menu.
	Select this button to return to the previous screen.
	Select this button to return to the <u>map view</u> or guidance view.
Â	This symbol shows that your device is connected to TomTom services.
	This symbol shows that your device is not connected to TomTom services.
(0)	This button shows that you will hear voice instructions. Select the button to switch off voice instructions. You will no longer hear spoken route instructions but you will still hear information such as traffic information and warning sounds.
	Tip : You can select the types of instructions you want to hear. Select Voices in the Settings Menu and select the instructions you want to hear.
(MA)	This button shows that you will not hear voice instructions. Select this button to switch on voice instructions.
X	This button shows that the display is using day colours. Select the button to reduce the brightness of the screen and display the map in darker colours.
	When driving at night or when driving through a dark tunnel, it is easier to view the screen and less distracting for the driver if the brightness of the screen is dimmed.
	Tip : Your device automatically switches between day and night colours depending on the time of day. To switch off this feature, select Appearance in the Settings menu and switch off Switch to night colours when dark .
C	This button shows that the display is using night colours. Select the button to increase the brightness of the screen and display the map in brighter colours.

Running in the background

The navigation app continues to run when it is in the background, for example when you are using another app on the TomTom BRIDGE.

If the navigation app is running in the background and you are driving on a planned route, you will continue to hear driving instructions.

Traffic

About TomTom Traffic

TomTom Traffic is a unique TomTom service providing real-time traffic information. For more information about TomTom services, go to <u>tomtom.com/services</u>.

In combination with IQ Routes, TomTom Traffic helps you plan the optimum route to your destination taking into account the current local traffic conditions and the weather.

Your navigation app regularly receives information about the changing traffic conditions. If traffic jams, heavy rain, snow or other incidents are found on your current route, your navigation app will offer to replan your route to try and avoid any delays.

Important: When you approach a faster alternative route, you get a warning in the route bar and you can see the alternative route in both the guidance view and the map view. To accept a faster route, just steer towards the alternative route as you approach it and your device will select it.

The TomTom BRIDGE uses either a permanent connection or a smartphone connection to <u>connect to TomTom services</u>.

Important: If use your smartphone to connect to TomTom Services and you are outside of the area covered by your mobile data plan, you may be liable for extra roaming charges while using TomTom Services.

Note: Some TomTom services might not be available in your current location.

Looking at traffic on the map

Traffic incidents are shown on the map. If several traffic incidents overlap the highest priority incident is shown - for example, a road closure is higher priority than road works or a closed lane.

Tip: Select an incident on the map to see more detailed information.

1. Traffic incident that affects your route in your direction of travel.

A symbol or number at the start of the incident shows the type of incident or the delay in minutes, for example 5 minutes.

The colour of the incident indicates the speed of traffic relative to the maximum allowed speed at that location, with red being the slowest. The stripes on the traffic jam are also animated to show the speed of the traffic, where appropriate.

For a complete list of incident types, see Traffic incidents.

- 2. Traffic incident on your route but in the opposite direction of travel.
- 3. Traffic incidents on roads that are not visible at your current zoom level.

Looking at traffic on your route

Information about traffic incidents on your route is shown in the route bar on the right-hand side of the map and guidance views.

The <u>route bar</u> tells you about traffic delays while you are driving, using symbols to show you where each traffic incident is located on your route. When using the map view, you can also select symbols on the map itself.

Note: If your TomTom BRIDGE isn't receiving any traffic information, a symbol showing traffic with a cross appears underneath the arrival information panel.

Note: To make the route bar more readable some incidents may not be shown. These incidents will always be of minor importance and only cause short delays.

To get more information about an incident, select an incident in the route bar. The map opens zoomed in on the incident and an information panel opens showing detailed information about the traffic incident.

The information shown includes:

- The cause of the traffic incident for example accident, road works, lane closure, or weather.
- The severity of the incident slow traffic, queuing traffic or stationary traffic.
- The delay time.
- The length of the incident.

For a complete list of incident types, see Traffic incidents.

Select the back button to go back to the guidance view.

Traffic incidents

The following traffic incident symbols are used in the map view and in the route bar to show the cause of a traffic jam:

Ð	Traffic
(Accident
•	Dangerous conditions
	Roadworks
6	Lane closure
•	Road closure
	Rain
E	Fog
*	Ice or snow
R	Wind

The symbol or number at the start of the incident shows the type of incident or the delay in minutes, for example 4 minutes.

The colour of the incident indicates the speed of traffic relative to the maximum allowed speed at that location, with red being the slowest. The stripes on the traffic jam are also animated to show the speed of the traffic, where appropriate.

4	Traffic speed is 0% to 20% of the allowed speed.
4	Traffic speed is 20% to 40% of the allowed speed.
4	Traffic speed is 40% to 100% of the allowed speed.
4 >>>	Traffic speed is normal.
	Road closed, no traffic.

Approaching a traffic jam warning

A warning is given as you approach a traffic jam. You are warned in several ways:

1	16:35
××	5.5 km
4	1:50 min
	200
	200 m

- A warning symbol is shown in the <u>route bar</u>.
- The route bar zooms in to the start of the traffic jam.
- Your distance to the start of the traffic jam is shown in the route bar.
- The colour of the road on the route bar changes to orange or red, depending on the severity of the traffic jam.
- The background colour of the route bar background changes to red if you are driving too fast towards the traffic jam.
- You hear a warning sound.

To change the way you are warned, select Sounds & Warnings in the Settings menu.

Avoiding a traffic jam on your route

You can avoid a traffic jam that is on your route.

Note: Sometimes the quickest route is still the route that has the traffic jam. **Note**: It may not be possible to find an alternative route around the traffic jam if none exists.

Avoiding a traffic jam using the route bar

1. In the route bar, select the symbol for the traffic jam you want to avoid.

The traffic jam is shown on the map.

2. Select the pop-up menu button.

Select Avoid in the pop-up menu.
A new route is found that avoids the traffic jam.

Avoiding a traffic jam using the map

- On the map view, zoom in and select the traffic jam that is on your route. The traffic jam with an information panel is shown on the map.
- 2. Select the pop-up menu button.

3. Select Avoid.

A new route is found that avoids the traffic jam.

Selecting a faster route

When a faster route is found, you are asked if you want to take the faster route.

Tip: To be asked to select a route, select Ask me so I can choose in the Route Planning menu in <u>Settings</u>.

If you've not already selected the faster route, as you approach the faster route it is shown on the guidance view in green. A decision symbol is shown in the route bar.

To select the faster route, take the green route shown. Your device automatically displays your new route.

To ignore the faster route, just continue following your current route.

To get more information about the faster route, select the decision symbol in the route bar. The map opens zoomed in on the location where you have to take the new route.

Moving Lane Guidance

Note: Lane guidance is not available for all junctions or in all countries.

Moving Lane Guidance helps you prepare for motorway exits and junctions by showing the correct driving lane for your planned route.

As you approach an exit or junction, the lane you need is shown on the screen and in the instruction panel.

Tip: To close the lane image, select anywhere on the screen.

To turn lane images off, select the **Settings** button in the Main Menu, then select **Appearance**. Switch off the **Show previews of motorway exits** setting.

Time-dependent speed limits

Some speed limits change depending on the time of day. For example, you may see the speed limit near schools decrease to 40 km/h or 25 mph in the morning between 08.00 - 09.00 and in the afternoon between 15.00 - 16.00. Where possible, the speed limit shown in the speed panel changes to show these variable speed limits.

Some speed limits change depending on driving conditions. For example, the speed limit will decrease if there is heavy traffic, or the weather conditions are bad. These variable speed limits are not shown in the speed panel. The speed shown in the speed panel is the maximum speed limit allowed in good driving conditions.

Important: The speed limit shown in the speed panel is only an indication. You must always obey the actual speed limit for the road you are on and the conditions you are driving in.

Setting your vehicle type

About My Vehicle

Important: Route planning for a specific vehicle type is available only when a truck map is installed. If a truck map is not installed, a car route is planned instead.

<u>My Vehicle</u> lets you choose the type of vehicle you are driving so that the route planned by your device is suitable for your vehicle.

Each vehicle type except **Car** has adjustable settings for dimensions, weight and maximum speed. Routes planned by your device avoid restrictions for the vehicle type, and take into account the vehicle's specific settings. The following list shows you some examples of route restrictions:

- A route calculated for a van may be different from the route calculated for a car because of weight or height restrictions.
- A truck may be only permitted to drive on certain roads through a city.
- A route planned for a large vehicle, for example Bus or Truck, favours major roads, assumes you are travelling at a lower average speed and also selects routes without sharp turns.

Important: You must pay attention to all traffic signs, especially those relating to your vehicle's dimensions and weight. We cannot guarantee you will never encounter them on your route and ignoring such restrictions can be dangerous and illegal.

Setting your vehicle type

You can set your vehicle's type and specific settings so that the route planned by your device is suitable for your vehicle. If you want to use your TomTom BRIDGE in another type of vehicle, just change the vehicle type and settings.

Note: If the My Vehicle screen has been preset and locked by the system administrator you cannot change your vehicle type and specification.

1. Select **Settings** in the Main Menu, then select **My Vehicle**.

The My Vehicle screen is shown.

2. Select Vehicle Type then select your vehicle type from the list shown.

- 3. Read the Your Safety information then select OK.
- 4. The My Vehicle screen is shown with the settings for the selected vehicle type.

Select each setting and enter the correct value for your vehicle type. If a setting will not be a route restriction, for example **Maximum Speed**, set it to zero.

Tip: For Bus and Truck vehicle types, the dimensions, weight and maximum speed are pre-set. Adjust the settings to match your vehicle's actual specifications.

Important: Settings that are set at zero are not used to determine restrictions when a route is planned.

- 5. If your vehicle is a Truck transporting hazardous materials, select **HAZMAT** then select the type of hazardous material being transported.
- 6. Return to the map view and plan a route.

A route is planned that avoids route restrictions applicable to your vehicle.

You can <u>find an alternative route or change the route type</u> for all types of vehicles, taking into account the vehicle's specific settings.

Planning a route for a Bus or Truck

When you <u>plan a route</u> and you have a Bus or Truck as your <u>vehicle type</u>, you are shown the My Vehicle screen before your route is calculated. Check that your vehicle's settings are correct then select the continue button:

A route is planned and guidance to your destination begins. As soon as you start driving, the guidance view is shown automatically.

Viewing route restrictions

If your vehicle type is set to Bus or Truck, you can see route restrictions in the guidance view as you drive, and in <u>map view</u> when you have planned a route. In map view, zoom in to see the restricted roads.

Restricted roads are shown coloured. If your planned route uses a restricted road then the restricted section is shown dotted.

Important: You must pay attention to all traffic signs, especially those relating to your vehicle's dimensions and weight. We cannot guarantee you will never encounter them on your route and ignoring such restrictions can be dangerous and illegal.

Using quick search

About search

QUICK SEARCH ONLY

You can use the search feature to find a wide range of places and then navigate to them. You can search for the following:

- A specific address, for example, type in **123 Oxford Street, London**.
- A partial address, for example, type in **Oxford st Lon**.
- A type of place, for example, type in **petrol station** or **restaurant**.
- A place by name, for example, type in **Starbucks**.
- A postcode, for example, type in **W1D 1LL** for Oxford Street, London.

Tip: To search for a specific street in the United Kingdom or the Netherlands, type in a postcode, then leave a space and then type in the house number. For example, **1017CT 35**. For other countries, postcodes are area-based and will give you a list of matching cities, towns and streets in your search results.

- A city to navigate to a city centre, for example, type in **London**.
- A POI (Point of Interest) near your current location, for example, type in restaurant near me.
- A mapcode, for example, type in WH6SL.TR10
- Latitude and longitude coordinates, for example, type in: N 51°302313 W 0°082343.

Entering search terms

When no route is planned, you can start a search by entering a name or address at the top of the screen.

Alternately, select **Search** in the <u>Main Menu</u> to start searching for addresses and POIs. The search screen opens showing the device keyboard and the following buttons:

Tip: Hide the device keyboard to show the whole search screen.

1. Back button

Select this button to go back to the previous screen.

2. Search input box

Enter your search term here. As you type, matching addresses and POIs are shown.

Tip: If you press and hold a letter key on the keyboard, you get access to extra characters if they are available. For example, press and hold the letter "e" to access characters 3 e è é ê ë and more.

Tip: To edit, select a word you have already typed to place the cursor. You can then insert or delete characters.

3. Type of search.

By default, the whole of the current map is searched. Once you have used search, the last search type you selected is used. Select this button to change the type of search to any of the following:

Whole map

Select this option to search the whole of your current map with no limit to the search radius. Your current location is the centre of the search. The results are ranked by exact match.

Near me

Select this option to search with your current GPS location as the search centre. The results are ranked by distance.

In town or city

Select this option to use a town or city as the centre for your search. You need to enter the town or city name using the keyboard. When you have selected the town or city from the results list, you can search for an address or POI in that city.

Along route

When a route has been planned, you can select this option to search along your route for a specific type of location, for example, petrol stations. When prompted, enter the type of location and then select it in the right-hand column to carry out the search.

Near destination

When a route has been planned, you can select this option to use your destination as the centre for your search.

Latitude Longitude

Select this option to enter a pair of latitude longitude coordinates.

4. View button

Select this button to return to the map view or guidance view.

5. List/map button

Select this button to switch between showing the results in a list or showing the results on the map.

6. Show/hide keyboard button

Select this button to show the keyboard. Hide the keyboard using the device's back function.

Tip: To cancel a search, select the map/guidance view button in the top right-hand corner of the screen.

Working with search results

QUICK SEARCH ONLY

Your search results are shown in two columns.

Address and city matches are shown in the left-hand column, and POIs, types of POIs and Places are shown in the right-hand column. Recent destinations and saved places are also shown in your search results.

Tip: To see more results, hide the keyboard or scroll down the results list.

Tip: You can switch between seeing the results on the map or in a list by selecting the list/map button:

When you select an address from the list of search results, you can choose to show it on the map, add a crossroad or plan a route to that chosen location. To get an exact address you can add the house number.

If you show the result on the map, you can use the pop-up menu to <u>add the location</u> to My Places. If a route is already planned, you can add the location to your current route.

Note: The best search results are shown on the map. When you zoom in, the lower ranked search results are gradually shown.

About postcodes

When searching using a postcode, your results depend on the type of postcode used in the country that you are searching in.

The following types of postcodes are used:

- Postcodes that navigate you to a street or part of a street.
- Postcodes that navigate you to an area comprising, for example, a single town, several villages in a rural area or a district in a large city.

Postcodes for streets

Countries such as the Netherlands and the United Kingdom use this type of postcode. When you search using this type of postcode, enter the postcode, then leave a space and then optionally enter the house number. For example, "1017CT 35". Your device then plans a route to a specific house or building on a specific street.

Postcodes for areas

Countries such as Germany, France and Belgium use this type of postcode. If you search using a postcode for an area, your results include all the streets in a city district, the whole town, or the villages within that postcode.

When using quick search, you may get results from multiple countries if you enter a postcode for an area.

Note: If you search using a postcode for an area, you will not get a specific address in your results.

This type of postcode is still very useful in reducing the number of search results. For example, a search for Neustadt in Germany returns a long list of possible results. Adding a space followed by the postcode for an area narrows the results down to the Neustadt that you are looking for.

As another example, if you want to search in a city, enter a postcode for an area and select the city centre you are searching for from the results.

About mapcodes

QUICK SEARCH ONLY

In countries where roads and houses have no names or addresses, you can use a mapcode instead. A mapcode represents a location.

Every location on Earth, including those in the sea like islands and oil rigs, can be represented by a mapcode. Mapcodes are short, and easy to recognise, remember and communicate. They are precise to a few metres, which is good enough for every-day use.

Go to <u>mapcode.com</u> for instructions on how to find the mapcode for a location.

Mapcodes are more precise and more flexible than the address on a business card. You can choose a location that you want to associate with your address, for example, the main entrance or the entrance to a car park.

Planning a route using quick search

Planning a route to an address

QUICK SEARCH ONLY

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

To plan a route to an address using search, do the following:

1. Select the Main Menu button to open the Main Menu.

2. Select Search.

The search screen opens with the keyboard showing.

3. Use the keyboard to enter the name of the place you want to plan a route to.

Tip: If you press and hold a letter key on the keyboard, you get access to extra characters if they are available. For example, press and hold the letter "e" to access characters 3 e è é ê ë and more.

You can search for an address, town, city, postcode or mapcode.

Tip: To search for a specific street in the United Kingdom or the Netherlands, type in a postcode, then leave a space and then type in the house number. For example, **1017CT 35**. For other countries, postcodes are area-based and will give you a list of matching cities, towns and streets in your search results.

Note: When searching, the whole map is searched. If you want to change how the search is done, select the button to the right of the search box. You can then change where the search is done, for example, to being along the route or in a city.

4. As you type the address, suggestions based on what you have entered are shown in columns. You can continue typing or select a suggestion. Tip: To see more results, hide the keyboard or scroll down the results list.

Tip: You can switch between seeing the results on the map or in a list by selecting the list/map button:

5. Select an address suggestion.

Park Terrace						Uig Portree, Port				
		Sho	w on Ma	p) (Ac	ld Crossr	road	🕤 Driv	e		
				1	T					
Q ⁻¹	W	E	R ⁴	Т	Y	U	1	0 *	P	•
A	S	D	F	G	Н	J	к	L		€
•	Z	X	C	۷	В	N	М	!	?	+
7123	۵	1						7		٢

6. Enter the house number if you have one and haven't entered it already.

6 Park Terrace						-	Uig Portree, Port			
-		Show	v on Ma	p) (Ad	ld Crossr	road	🕤 Driv	re		
	2		-		X	7				
q	w	е	r	t	у	u	i	0	Р	×
a	s	d	f	g	h	j	k	1		€
٥	z	x	c	۷	b	n	m	!	?	٥
7123	\$	1						•		٢

If you don't have a house number, select Add Cross Road or Show on Map.

Tip: If you enter a house number that is not found, then the number appears red. The nearest house number that is found is shown in the Drive button. You can enter a new house number, or you can select **Drive/Ride** to drive to the nearest house number.

7. Select Drive/Ride depending on which device you are using.

A route is planned and then guidance to your destination begins. As soon as you start driving, the guidance view is shown automatically.

Tip: If your destination is in a different time zone, you see a plus (+) or a minus (-) sign and the time difference in hours and half hours in the <u>arrival information panel</u>. The estimated time of arrival is the local time at your destination.

Tip: You can add a stop to a route that you have already planned.

Tip: You can save a route using My Routes.

Planning a route to a city centre

QUICK SEARCH ONLY

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

To plan a route to a city centre using search, do the following:

1. Select the Main Menu button to open the Main Menu.

2. Select Search.

The search screen opens with the keyboard showing.

3. Use the keyboard to enter the name of the city or town you want to plan a route to.

You can search for a town, city, or postcode.

Tip: To search for a specific city you can use the city's postcode or the country. For example, searching for Essen will return many results. If you search for Essen 2910 or Essen Belgium then that city will be at the top of the results. You can then search in the city.

Tip: When searching, the whole map is searched. If you want to change how the search is done, select the search type button then select a search option.

4. As you type, suggestions based on what you have entered are shown in columns. You can continue typing or select a suggestion.

Tip: To see more results, hide the keyboard or scroll down the results list.

Tip: You can switch between seeing the results on the map or in a list by selecting the list/map button:

5. Select the city in the left-hand column.

The city name is shown in the right side of the search input box, and the city centre POI is shown below in the right-hand column.

6. Select the city centre POI.

The city centre location is shown on the map.

7. Select **Drive/Ride** depending on which device you are using.

A route is planned and then guidance to your destination begins. As soon as you start driving, the guidance view is shown automatically.

Tip: If your destination is in a different time zone, you see a plus (+) or a minus (-) sign and the time difference in hours and half hours in the <u>arrival information panel</u>. The estimated time of arrival is the local time at your destination.

Tip: You can add a stop to a route that you have already planned.

Tip: You can save a route using <u>My Routes</u>.

Planning a route to a POI

QUICK SEARCH ONLY

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

To plan a route to a POI type or a specific POI (Point of Interest) using search, do the following:

1. Select the Main Menu button to open the Main Menu.

2. Select Search.

The search screen opens with the keyboard showing.

3. Use the keyboard to enter the name of the place you want to plan a route to.

Tip: If you press and hold a letter key on the keyboard, you get access to extra characters if they are available. For example, press and hold the letter "e" to access characters 3 e è é ê ë and more.

You can search for a POI (Point of Interest) type, such as a restaurant or tourist attraction. Alternatively, you can search for a specific POI, for example "Rosie's Pizzeria".

Note: When searching, the whole map is searched. If you want to change how the search is done, select the search type button and then select a search option.

4. As you type, suggestions based on what you have entered are shown in columns. You can continue typing or select a suggestion.

Tip: To see more results, hide the keyboard or scroll down the results list.

Tip: You can switch between seeing the results on the map or in a list by selecting the list/map button:

- Select a POI type or an individual POI. If you selected a POI type, select a POI. The location is shown on the map.
- 6. To see more information about the POI, select the POI on the map and then select the pop-up menu button. Select **More Information** on the pop-up menu.

You see more information about the POI such as the phone number, full address and email.

 To plan a route to this destination, select **Drive**/**Ride** depending on which device you are using.

A route is planned and then guidance to your destination begins. As soon as you start driving, the guidance view is shown automatically.

Tip: If your destination is in a different time zone, you see a plus (+) or a minus (-) sign and the time difference in hours and half hours in the <u>arrival information panel</u>. The estimated time of arrival is the local time at your destination.

Tip: You can add a stop to a route that you have already planned.

Tip: You can save a route using My Routes.

Planning a route to a POI using online search

QUICK SEARCH ONLY

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

Note: Searching online is only available on connected devices. To search online on your TomTom BRIDGE, you must be <u>connected to TomTom services</u>.

If you did a <u>POI search</u> but could not find the POI you were looking for, you can search TomTom Places online. To find POIs by searching online, do the following:

1. <u>Search for a POI</u> using Search in the Main Menu.

The search results are shown in two columns.

- 2. Select Search Places Online.
- 3. Use the keyboard to enter the name of the POI you want to find, then press the Search button on the keyboard.

Tip: If you press and hold a letter key on the keyboard, you get access to extra characters if they are available. For example, press and hold the letter "e" to access characters 3 e è é ê ë and more.

You can search for a POI (Point of Interest) type, such as a restaurant or tourist attraction. Alternatively, you can search for a specific POI, for example "Rosie's Pizzeria".

Note: When searching, you can search near your current location, in a town or city, or near your destination. If you want to change how the search is done, select the button to the right of the search box.

The search results are shown in a column.

Tip: To see more results, hide the keyboard or scroll down the results list.

Tip: You can switch between seeing the results on the map or in a list by selecting the list/map button:

4. Select an individual POI from the list. The location is shown on the map. 5. To see more information about the POI, select the POI on the map and then select the pop-up menu button. Select **More Information** on the pop-up menu.

You see more information about the POI such as the phone number, full address and email.

6. To plan a route to this destination, select **Drive/Ride** depending on which device you are using.

A route is planned and then guidance to your destination begins. As soon as you start driving, the guidance view is shown automatically.

Tip: If your destination is in a different time zone, you see a plus (+) or a minus (-) sign and the time difference in hours and half hours in the <u>arrival information panel</u>. The estimated time of arrival is the local time at your destination.

Tip: You can add a add a stop to a route that you have already planned.

Tip: You can save a route using My Routes.

Planning a route using the Internet browser

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

Note: This feature is not available on all devices.

You can search the Internet using the TomTom BRIDGE Internet browser, then select text from the search results to share with the TomTom Navigation app. To plan a route using the Internet browser, do the following:

1. Open the TomTom BRIDGE Internet browser and search for a place or POI.

2. Select the POI address or name.

3. Select the SHARE button to show the share options.

🚱 www.tomtom.com/en	london bridge - Goo

4. Select Navigation.

The Navigation app starts and the search screen opens with the keyboard showing. The selected text appears at the top of the screen and the search suggestions based on the selected text are shown in columns.

Tip: To see more results, hide the keyboard or scroll down the results list.

Tip: You can switch between seeing the results on the map or in a list by selecting the list/map button:

5. Select an address suggestion and enter the house number if you have one and haven't entered it already.

Tip: If you enter a house number that is not found, then the number appears red. The nearest house number that is found is shown in the Drive button. You can enter a new house number, or you can select Drive to drive to the nearest house number.

6. Select Drive.

A route is planned and then guidance to your destination begins. As soon as you start driving, the guidance view is shown automatically.

Tip: If your destination is in a different time zone, you see a plus (+) or a minus (-) sign and the time difference in hours and half hours in the <u>arrival information panel</u>. The estimated time of arrival is the local time at your destination.

Tip: You can add a stop to a route that you have already planned.

Tip: You can save a route using My Routes.

Planning a route using the map

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

To plan a route using the map, do the following:

1. Move the map and zoom in until you can see the destination that you want to navigate to.

Tip: You can also select a map symbol to open the pop-up menu, then select the **Drive/Ride** button to plan a route to that location.

2. When you have found your destination on the map, select it by pressing and holding the screen for about one second.

A pop-up menu shows the nearest address.

3. To plan a route to this destination, select **Drive/Ride** depending on which device you are using.

A route is planned and then guidance to your destination begins. As soon as you start driving, the guidance view is shown automatically.

Tip: You can use the location you selected in other ways, such as adding it to <u>My Places</u>, by selecting the pop-up menu button.

Tip: If your destination is in a different time zone, you see a plus (+) or a minus (-) sign and the time difference in hours and half hours in the <u>arrival information panel</u>. The estimated time of arrival is the local time at your destination.

Tip: You can add a stop to a route that you have already planned.

Tip: You can save a route using <u>My Routes</u>.

Planning a route using My Places

To navigate to one of <u>My Places</u> from your current location, do the following:

1. Select the Main Menu button to open the Main Menu.

2. Select My Places.

A list of all your Places opens.

3. Select the Place you want to navigate to, for example Home.

Your chosen Place is shown on the map with a pop-up menu.

4. To plan a route to this destination, select **Drive/Ride** depending on which device you are using.

A route is planned and then guidance to your destination begins. As soon as you start driving, the guidance view is shown automatically.

Tip: If your destination is in a different time zone, you see a plus (+) or a minus (-) sign and the time difference in hours and half hours in the <u>arrival information panel</u>. The estimated time of arrival is the local time at your destination.

Tip: You can add a stop to a route that you have already planned.

Tip: You can save a route using <u>My Routes</u>.

Planning a route using coordinates

QUICK SEARCH ONLY

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

To plan a route using a pair of coordinates, do the following:

1. Select the Main Menu button to open the Main Menu.

2. Select Search.

The search screen opens with the keyboard showing.
3. Select the type of search button to the right of the search box.

4. Select Latitude Longitude.

Tip: The example coordinates shown on the screen are your current latitude and longitude.

- 5. Type in your pair of coordinates. You can enter any of these coordinate types:
 - Decimal values, for example:
 N 51.51000 W 0.13454
 51.51000 -0.13454

Tip: For decimal values you don't have to use a letter to indicate the latitude and longitude. For locations west of the 0 meridian and locations south of the equator, use a minus sign (-) before the coordinate.

- Degrees, minutes and seconds, for example: N 51°302313 W 0°082343
- GPS standard coordinates, for example: N 51 30.525 W 0 08.569

Note: The bar below the coordinates goes red if you enter coordinates that are not recognised by your TomTom BRIDGE.

6. As you type in the coordinates, suggestions are shown based on what you have entered. You can continue typing or select a suggestion.

Towns and roads are shown on the left, POIs are shown on the right.

Tip: To see more results, hide the keyboard or scroll down the results list.

Tip: You can switch between seeing the results on the map or in a list by selecting the list/map button:

7. Select a suggestion for your destination.

The location is shown on the map.

8. To plan a route to this destination, select **Drive/Ride** depending on which device you are using.

A route is planned and then guidance to your destination begins. As soon as you start driving, the guidance view is shown automatically.

Tip: If your destination is in a different time zone, you see a plus (+) or a minus (-) sign and the time difference in hours and half hours in the <u>arrival information panel</u>. The estimated time of arrival is the local time at your destination.

Tip: You can add a stop to a route that you have already planned.

Tip: You can save a route using <u>My Routes</u>.

Planning a route using a mapcode

QUICK SEARCH ONLY

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

To plan a route using a mapcode, do the following:

1. Select the Main Menu button to open the Main Menu.

2. Select Search.

The search screen opens with the keyboard showing.

- 3. Type in your mapcode. You can enter any of these mapcode types:
 - International, for example, WH6SL.TR10.
 - Country-specific, for example, GBR 8MH.51.
 - Alternative country-specific, for example, GBR 28.Y6VH or GBR LDGZ.VXR.

Tip: All the mapcodes in this example are for the same location - Edinburgh Castle in the UK. See <u>About mapcodes</u> for information on how to get a mapcode for a location.

 When the full map code has been entered, the location is shown in the Addresses column. Towns and roads are shown on the left, POIs are shown on the right.

Tip: To see more results, hide the keyboard or scroll down the results list.

Tip: You can switch between seeing the results on the map or in a list by selecting the list/map button:

- 5. Select a suggestion for your destination.
- 6. To plan a route to this destination, select **Drive/Ride** depending on which device you are using.

A route is planned and then guidance to your destination begins. As soon as you start driving, the guidance view is shown automatically.

Tip: If your destination is in a different time zone, you see a plus (+) or a minus (-) sign and the time difference in hours and half hours in the <u>arrival information panel</u>. The estimated time of arrival is the local time at your destination.

Tip: You can add a stop to a route that you have already planned.

Tip: You can save a route using <u>My Routes</u>.

Planning a route in advance

You can plan a route in advance before you drive it. You can save the route as part of your <u>My</u><u>Routes</u> list.

To plan a route in advance, do the following:

- 1. Search for the location you want to use as a starting point.
- 2. Select Show on Map.
- 3. Select the pop-up menu button.

A pop-up menu shows a list of options.

- 4. Select Use as Starting Point.
- 5. Search for the location you want to use as your destination.
- 6. Select Show on Map.
- 7. Select **Drive**/**Ride** in the pop-up menu.

Your route is planned using your chosen starting point and destination. The estimated journey time is shown at the top of the route bar.

Tip: Stops, POIs and Places can all be selected as starting points using their pop-up menus. **Tip**: You can <u>save the route in My Routes</u>.

8. To drive to the starting point, select **Drive/Ride** at the top of the screen.

The starting point of the route is converted to your first stop and then the route is planned. Guidance to your destination begins from your current location. As soon as you start driving, the guidance view is shown automatically.

Changing the starting point to be your current location

- 1. Select the starting point of the route in the map view.
- 2. Select the pop-up menu button.

A pop-up menu shows a list of options.

3. Select Remove Starting Point.

Your route is replanned with your current location as the starting point. The original starting point is removed from your route.

Changing the starting point into a stop

- 1. Select the starting point on the route in the map view.
- 2. Select the pop-up menu button.

A pop-up menu shows a list of options.

3. Select Change to a Stop.

Your route is replanned with the starting point changed into a stop.

Finding a car park

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

To find a car park, do the following:

1. Select the Main Menu button to open the Main Menu.

2. Select Parking.

The map opens showing the locations of car parks.

If a route is planned, the map shows car parks near your destination. If a route isn't planned, the map shows car parks near your current location.

You can change the screen to show a list of car parks by pressing this button:

You can select a car park from the list to locate it on the map.

Tip: You can scroll down the list of results using the scroll bar on the right side of the screen.

If you want to change how the search is done, select the button to the right of the search box. You can then change where the search is carried out, for example, to search near you or the whole map.

Select a car park from the map or the list.
 A pop-up menu opens on the map showing the name of the car park.

Parking	Mar destination	
Đ	P Ipark Meet & Greet Great Southwest Road, Hillingdon TW14 8NT	
-		
2	Ž 🗐 💿 💼	

4. Select **Drive**/**Ride** depending on which device you are using.

A route is planned and then guidance to your destination begins. As soon as you start driving, the guidance view is shown automatically.

Tip: You can add a car park as a stop on your route by using the pop-up menu.

Finding a petrol station

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

To find a petrol station, do the following:

1. Select the Main Menu button to open the Main Menu.

2. Select Petrol Station.

The map opens showing the locations of petrol stations.

If a route is planned, the map shows petrol stations along your route. If a route isn't planned, the map shows petrol stations near your current location.

You can change the screen to show a list of petrol stations by pressing this button:

You can select a petrol station from the list to locate it on the map.

Tip: You can scroll down the list of results using the scroll bar on the right side of the screen.

If you want to change how the <u>search</u> is done, select the button to the right of the search box. You can then change where the search is carried out, for example, to search near you or the whole map.

3. Select a petrol station from the map or the list.

A pop-up menu opens on the map showing the name of the petrol station.

4. Select **Drive**/**Ride** depending on which device you are using.

A route is planned and then guidance to your destination begins. As soon as you start driving, the guidance view is shown automatically.

Tip: You can add a petrol station as a stop on your route by using the pop-up menu. A petrol station that is a stop on your route has a blue icon.

Changing your route

The Current Route menu

When you have planned a route or track, select the **Current Route** or **Current Track** button in the Main Menu to open the Current Route or Current Track Menu.

The following buttons are available in the menu:

Clear Route / Clear Track	Select this button to clear the currently planned route or track. The Current Route Menu closes and you return to the <u>map view</u> .		
	Tip : You can also clear a route by using the button at the bottom of the <u>route bar</u> .		
Skip Next Stop	Select this button to <u>skip the next stop</u> on your route.		
Find Alternative	You see this button when you have planned a route. Select this button to show up to three <u>alternative routes</u> on the <u>map view</u> .		
Avoid Blocked Road	Select this button to <u>avoid an unexpected obstacle</u> that is blocking the road on your route.		
Avoid Part of Route	Select this button to <u>avoid part of a route</u> .		
Avoid Toll Roads and More	Select this button to avoid some <u>types of route features</u> that are on your currently planned route. These include ferries, toll roads and unpaved roads. You can also <u>avoid route features</u> using the route bar.		

Show Instructions	 Select this button to see a list of turn-by-turn text instructions for your planned route. The instructions include the following: Your current location. Street names. Up to two road numbers shown in road shields whenever available. An instruction arrow. An instruction description. The distance between two consecutive instructions. Exit number. The full addresses of stops on your route. 	
	Tip: Select an instruction to see a preview of that section of the route in the map view.You can also select the instruction panel in the guidance view to see turn-by-turn text instructions.	
Add Stop to Route	Select this button to add a stop to your currently planned route. You can also add a stop to your route directly from the map.	
Add to My Routes	If you plan a new route that has not already been saved, you see this button. Select this button to save this route as part of your <u>My Routes</u> list.	
Save Changes to Route	If you make a change to a <u>My Route</u> , you see this button. Select this button to save the changes.	
Change Route Type	Select this button to change the type of route used to plan your route. Your route will be recalculated using the new route type.	
Reorder Stops	Select this button to see the lists of stops for your current route. You can then <u>change the order of the stops on your route</u> .	

Drive to Route or Track	Select Drive to Route to plan a route from your current location to the starting point of a <u>My Route</u> . The starting point is converted to a stop.	
	Drive to Track plans a route to the nearest point of the track from your current position.	
Drive to Starting Point	On the Current Track menu, select this button to plan a route to the starting point of the track. The starting point is converted to a stop. For more information, see Navigating using a track.	
Share Track	On the Current Track menu, select this button to export the current track as a GPX file and save it on a memory card for sharing with other users.	
Play Route or Track Preview	Select this button to watch a preview of your planned route or track.	
Stop Route or Track Preview	Select this button to stop the preview of your planned route or track.	

Avoiding a blocked road

If there is a blocked road on your route you can change your route to avoid it.

1. In the guidance view, select the current location symbol or the speed panel.

Tip: The speed panel is only shown when you have started driving on your route.

2. Select Avoid Blocked Road.

A new route is found that avoids the blocked road. You may get shown up to two alternatives depending on the road network between you and your destination.

The new route is shown on the map view with the difference in travel time in a balloon.

Note: It may not be possible to find an alternative route around the blocked road if none exists.

3. Select the new route by selecting the time balloon.

Guidance to your destination resumes avoiding the blocked road. As soon as you start driving, the guidance view is shown automatically.

Avoiding part of a route

If part of a road is blocked or you wish to avoid part of a route, you can select a specific section of a route to avoid.

1. Select the Main Menu button to open the Main Menu.

2. Select Current Route.

3. Select Avoid Part of Route.

A screen opens showing a list of the sections that comprise your current route.

4. Select the section of the route that you want to avoid.

A preview shows you the section you have chosen on the map.

5. Select Avoid.

A new route is found that avoids your chosen route section. The new route is shown on the map view.

Note: It may not be possible to find an alternative route around the route section if none exists.

Guidance to your destination resumes avoiding your chosen route section. As soon as you start driving, the guidance view is shown automatically.

Finding an alternative route

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

To find an alternative route, do the following:

- 1. Plan a route as usual.
- 2. On the map view, select the route itself.
- 3. Select the pop-up menu button to open the menu.
- 4. Select Alternative Route and then select Find alternative.

Up to three alternative routes are shown on the map view. Each alternative route shows the difference in travel time in a balloon. You can also select the **km/mi** button to show the difference as a distance.

Tip: Information from the TomTom <u>Traffic</u> is used when calculating alternative routes. Any route that is 50% longer in time than the original route is not shown.

Select your chosen route by tapping on the time balloon.
 Guidance to your destination begins. As soon as you start driving, the guidance view is shown automatically.

Note: There are two other ways of finding alternative routes:

- 1. Select Current Route in the Main Menu, followed by Find Alternative.
- 2. If your device has voice control, say "Find alternative".

Types of route

Select **Change Route Type** to change the type of route planned to your current destination. Your route is recalculated using the new route type.

You can select the following types of route:

Important: If you have selected Bus or Truck as your <u>vehicle type</u>, you can only choose route types **Fastest route** or **Shortest route**.

- **Fastest route** the fastest route to your destination. Your route is constantly checked taking into account the traffic conditions.
- **Shortest route** the shortest route to your destination. This may take much longer than the fastest route.
- Most eco-friendly route the most fuel-efficient route.
- Avoid Motorways this type of route avoids all motorways.

You can set the default route type in the Settings Menu.

Avoiding features on a route

You can choose to avoid some features that are on your currently planned route. You can avoid the following route features:

- Toll Roads
- Ferries and car shuttle trains
- Carpool Lanes
- Unpaved Roads

Note: Carpool lanes are sometimes known as High Occupancy Vehicle Lanes (HOV lanes) and are not present in every country. To travel on these lanes, you may need to have more than one person in the car, for example, or the car may need to use environmentally-friendly fuel.

If you choose to avoid a route feature, a new route is planned.

In Route Planning in the Settings Menu, you can set how each route feature is handled when a new route is planned.

To avoid a feature on your route, do the following.

1. Select the Main Menu button to open the Main Menu.

2. Select Current Route.

3. Select Avoid toll roads and More.

A screen opens showing a list of the features you can avoid. The features found on your route are highlighted.

- 4. Select the feature that you want to avoid.
- 5. Select OK.

A new route is found that avoids the feature. The new route is shown on the map view.

Note: It may not be possible to find an alternative route around the route feature if none exists.

Guidance to your destination resumes. As soon as you start driving, the guidance view is shown automatically.

Avoiding an incident or route feature using the route bar

You can avoid an incident or route feature that is on your route.

Note: It may not be possible to find an alternative route around the incident or route feature if none exists.

- 1. In the route bar, select the symbol for the route feature you want to avoid.
- 2. The route feature is shown on the map together with the pop-up menu.
- 3. Select Avoid in the pop-up menu.

A new route is found that avoids the route feature.

Adding a stop to your route from the current route menu

- 1. In the Main Menu, select Current Route.
- 2. Select Add Stop to Route.

The map view is shown.

- 3. To select a stop, do one of the following steps:
 - Zoom in on the map, then press and hold to select a location. In the pop-up menu, select **Add**.

Select **Search** and search for a location. When you have found a location, select **Add**.

Your route is recalculated to include your stop.

Adding a stop to your route using the map

- Press the <u>switch view button</u> to show the map. Your complete route is shown on the map.
- 2. Zoom in on the map, then press and hold to select a location.
- 3. Select the pop-up menu button.
- 4. Select Use in Route.
- 5. Select Add to Current Route.

Your route is recalculated to include your stop.

Deleting a stop from your route

1. In the <u>route bar</u>, press the stop you want to delete.

The map zooms in to the stop and shows a pop-up menu.

Tip: If you select the wrong stop press the back button to return to the map.

2. Select Delete This Stop.

The stop is deleted and your route is recalculated.

Skipping the next stop on your route

- 1. In the Main Menu, select Current Route.
- 2. Select Skip Next Stop.

The map view is shown. The next stop on your route is deleted and your route is recalculated.

Reordering stops on a route

- 1. In the Main Menu, select Current Route.
- 2. Select Reorder Stops.

The map view is shown with the route cleared. The starting point, destination and all the stops are shown.

Select the stops one by one in the order you wish to drive them.
 The symbols change to a flag as you select each stop. The last stop you select becomes your destination.

Your route is recalculated with the stops in the changed order.

My Routes

About My Routes

My Routes provides an easy way to save and retrieve routes and tracks.

You may want to use My Routes in one or more of the following situations:

- While working Your job involves driving several routes with multiple stops on a daily basis. Your routes can change and you need to be flexible and be able to change the order of your stops or change the planned route.
- While commuting to work You want to add one or two regular stops between home and work. Your route back home in the evening is the reverse of your route to work in the morning.

Routes can be created and saved on your TomTom BRIDGE. You can also use a tool such as Tyre Pro to create and edit routes and tracks.

About routes and tracks

The term "route" includes two types of route from one place to another:

Routes have a starting point and a destination, and perhaps some stops. Your device calculates your preferred type of route between all these points, for example, the fastest or most economical, and uses <u>Traffic</u>. You can edit a route by, for example, adding stops or moving the starting point. Routes can be imported but cannot be exported from your device.

Route to Marken

 Tracks also have a starting point and a destination, but have no stops. Your route follows the track as closely as possible, ignoring your preferred type of route and traffic conditions, and any traffic on the route. You can edit tracks using MyDrive. Tracks can be imported and exported from your device.

Tip: Tracks have a dotted arrow!

Important: Routes and tracks cannot be stored on the same memory card as maps because different memory card formatting is used.

About GPX and ITN files

GPX files (GPS exchange format)

GPX files contain a very detailed recording of where you have been on your track, including any off-road locations. GPX files become tracks after import.

Using GPX files

There are several things you can do with your GPX file:

Use TomTom MyDrive to view your track file.

• Export to a memory card or directly to your computer, then use your computer to view the file using software such as Google Earth.

Note: While viewing your recording, you may notice that the recorded GPS locations do not always correspond with the roads. This can happen for several reasons. Firstly, your device tries to keep the files small and this can cause a slight loss of data precision. Secondly, your device records the actual data from the GPS chip for an accurate representation of where you've been, rather than what you see on your screen. Thirdly, the software with which you view the recording may have the maps misaligned.

Share the file with others by exporting it.

Note: Tracks can be imported and exported.

ITN files (TomTom's own Itinerary file format)

An ITN file contains less detail than a GPX file. An ITN file can contain a maximum of 255 locations which is enough to recreate a route accurately. ITN files become routes after import.

Using ITN files

There are several things you can do with your ITN file:

- You can import an ITN file onto your TomTom BRIDGE so you can travel that same route again and get navigation instructions.
- Use TomTom MyDrive to view your route.

Saving a route

1. Plan a route using the steps described in <u>Planning a route</u>.

Tip: If you cannot see your planned route on the map view, select the back button to show your route.

- 2. Select the route.
- 3. Select the pop-up menu button to open the menu.

4. Select Manage Route, then Add to My Routes.

The name of the route is shown in the edit screen.

5. Edit the name of the route so that you can easily recognise it.

6. Save your route in the My Routes list.

Tip: You can also save a route using the Add to My Routes button in the Current Route menu.

Navigating using a saved route

To navigate using a previously saved route, do the following:

- 1. In the Main Menu, select My Routes.
- Select a route from your list. The route is shown on the map view.

3. To navigate to the start of the saved route, select **Drive/Ride** depending on which device you are using.

The starting point of the saved route is converted to your first stop and then the route is planned. Guidance to your destination begins from your current location. As soon as you start driving, the guidance view is shown automatically.

Tip: There are two other ways to navigate using a saved route:

Select the starting point of the route. When the pop-up menu opens, select **Change to a Stop**.

Alternatively, select **Drive to Route** or **Ride to Route** in the Current Route menu.

Navigating to a stop on a saved route

You can navigate from your current location to a stop on your saved route instead of to the start of the saved route. The stop is changed to the start of your route. Your new starting point might be one closer to your current location, or you might just want to make your route shorter.

Note: The route from the original starting point up to the new starting point is removed from the route.

Note: Your original route in My Routes is not changed. If you want to see the whole route, select the route again in My Routes.

- 1. In the Main Menu, select My Routes.
- 2. Select a route from your list.

The route is shown on the map view.

3. Select the stop that you want to use as your starting point, then select the pop-up menu button to open the menu.

4. Select Start Route From Here.

Your route is calculated from the new starting point.

5. Select Drive/Ride.

The starting point of your route is converted to your first stop and then the route is planned from your current location. Guidance to your destination begins. As soon as you start driving, the guidance view is shown automatically.

Tip: There are two other ways to navigate using a saved route:

Select the starting point of the route. When the pop-up menu opens, select **Change to a Stop**.

Alternatively, select **Drive to Route** or **Ride to Route** in the Current Route menu.

Adding a stop to a saved route using the map

Note: You can also press and hold a location on the map and select **Add to Current Route** from the pop-up menu.

- Press the <u>switch view button</u> to show the map. Your complete route is shown on the map.
- 2. Select the route.

3. Select the pop-menu button to open the menu.

- 4. Select Manage Stops.
- 5. Select Add Stop to Route.
- 6. Select your new stop on the map.

Tip: If you know the name of your new stop, you can use **Search** to select your stop instead of using the map.

 Select the Add Stop button to add this location as a stop. Your route is recalculated to include your stop.

Tip: To update the saved route in your My Routes list with the changes, select the route om the map then select **Save Changes to Route** in the pop-up menu.

Deleting a route or a track from My Routes

- 1. In the Main Menu, select My Routes.
- 2. Select Edit List.
- 3. Select the routes you want to delete.
- 4. Select Delete.

Recording a track

You can record a track while you drive, with or without a route planned. After recording, you can then export your track so that you can share it with others. Alternatively, you view it using TomTom MyDrive if you're logged in to MyDrive on your device.

To record a track, do the following:

1. In the Main Menu, select Start Recording.

A red dot appears in the lower right-hand corner of the screen and initially flashes 3 times to show that you are now recording. The dot remains on the screen until you stop recording.

- 2. To stop recording, select Stop Recording in the Main Menu.
- 3. Enter a name for your track or you can leave it at the suggested date-time combination.
- 4. Select **Add** or **Finished**, depending on the device you are using.
- 5. Your track is saved in My Routes.

Note: You can export tracks as GPX files and save them on a memory card for sharing with others.

Exporting tracks from the TomTom Navigation app

You can export tracks as GPX files and save them on the TomTom BRIDGE. Using a file explorer app or your computer, you can then share the files with others.

Important: Not every TomTom BRIDGE has a file explorer app.

Note: Currently, you can export only tracks from your TomTom BRIDGE.

To export one or more tracks, do the following:

- 1. In the Main Menu, select **My Routes**.
- 2. Select Share Tracks.

Tip: Alternatively, when in map view, select a track and select **Share Track** from the pop-up menu.

3. Select one or more tracks from your list for export.

Tip: To select or deselect all tracks for export, select the pop-up menu button.

4. Select Share.

You see the messages Exporting routes then Routes saved successfully.

Open the file explorer app or <u>connect your device to a computer</u>. You can find the track files in the TomTom BRIDGE internal storage in the **Routes** folder.

Tip: You can share the track files using Bluetooth, a computer, or a memory card.

Importing routes and tracks

Important: You can only transfer route and track files if a file explorer app is installed on your TomTom BRIDGE.

You can import the following file types:

- GPX files these become tracks after import.
- ITN files these become routes after import.

Tip: ITN files are TomTom itinerary files.

You can find GPX and ITN files on the Internet then transfer these files to <u>My Places</u> by <u>transferring</u> the files to your device.

To import a route or track, do the following:

- 1. Using a file explorer app, select the file you want to import.
- 2. Use the file explorer app's send or share function to select the TomTom Navigation app.
- 3. The TomTom Navigation app imports the route or track.
- When the route or track is successfully imported, select OK. You can find you route or track in <u>My Routes</u>.

Speed Cameras

About speed cameras

The Speed Cameras service warns you about the following camera locations:

- Fixed speed camera locations.
- Mobile speed camera locations.
- Mobile speed camera hotspots.
- Average speed camera locations.
- Speed enforcement zones.
- Red light camera locations.
- Traffic restriction cameras.

The Speed Cameras service also warns you about the following safety hazards:

- Accident blackspot locations.
- Traffic jams.

The TomTom BRIDGE uses either a permanent connection or a smartphone connection to <u>connect to TomTom services</u>.

Important: If you are outside of the area covered by your mobile data plan, you may be liable for extra roaming charges while using TomTom Services.

Note: TomTom services are not available in all countries or regions, and not all services are available in all countries or regions. For more information on available services in each region, go to <u>tomtom.com/services</u>.

Speed camera warnings

Warnings are given as you approach a speed camera. You are warned in several ways:

- A symbol is shown in the <u>route bar</u> and on your route on the map.
- Your distance to the speed camera is shown in the route bar.
- The speed limit at the camera location is shown in the route bar.
- You hear a warning sound as you get near the camera.
- While you are approaching a camera or driving in an average speed check area, your speed is monitored. If you drive more than 5 km/h or 3 mph over the speed limit the route bar turns red. If you drive less than 5 km/h or 3 mph over the speed limit the route bar turns orange.

Tip: In the <u>map view</u> or guidance view, you can select a speed camera symbol in the route bar to see the type of camera, the maximum speed and also the length of an average speed check area. In the map view, you can also select a speed camera that is shown on your route.

Symbol shown on map	Symbol shown in route bar	Description
0	ļ	Fixed speed camera - this type of camera checks the speed of passing vehicles and is fixed in one place.

Symbol shown on map	Symbol shown in route bar	Description
0	₽ €	Mobile speed camera - this type of camera checks the speed of passing vehicles and can be moved to different locations.
\bigcirc		Mobile speed camera hotspots - this type of warning shows places where mobile cameras are often used.
\bigcirc	۲ 	Average speed cameras - these types of cameras measure your average speed between two points. You are warned at the start and end of the average speed check area.
		While you are driving in an average speed check area, your average speed is shown, instead of your current speed. The distance to the end of the area is shown in the route bar.
o	110	Speed enforcement zones - these zones can contain multiple speed cameras.
	ŢŢ	You are warned at the start and end of a speed enforcement zone. While you are driving in a speed enforcement zone, your current speed is shown, and a visual warning is shown in the route bar.
	ت ا ا	Red light camera - this type of camera checks for vehicles breaking traffic rules at traffic lights. There are two types of traffic light camera - those which check if you drive through a red light and those which check for driving through a red light together with speeding.
0	ļ	Traffic restriction - this type of warning warns you about restricted roads.
0		Accident blackspot - this type of warning is given for a place where road traffic accidents have historically been concentrated.
		You are warned at the start and end of the accident blackspot. While you are driving in an accident blackspot, your current speed is shown and a visual warning is shown in the route bar.

Changing the way you are warned

To change the way you are warned about speed cameras, select **Sounds & Warnings** in the <u>Settings</u> menu.

You can then set how you want to be warned for the different types of cameras and safety hazards. You can choose to be warned, warned only if you are speeding, or never warned. To switch off all warnings, switch off **Speed cameras & hazards**.

Reporting a new speed camera

If you pass a new speed camera that you were not warned about, you can report it instantly.

Note: To report a speed camera, your device must have a mobile data connection.

You can report a speed camera in the following ways:

Note: Not all features are available on all apps.

Using the speed panel to report a speed camera

 Select the speed camera symbol on the speed panel in the guidance view. You see a message thanking you for reporting the camera.

Tip: If you make a mistake when reporting a camera, select Cancel in the message.

The speed camera is saved on your device automatically and also sent to other users.

Using the quick menu to report a speed camera

- 1. Select the current location symbol or the speed panel in the guidance view.
- 2. Select **Report Speed Camera** from the pop-up menu.

You see a message thanking you for reporting the camera.

Tip: If you make a mistake when reporting a camera, select Cancel in the message.

The speed camera is saved on your device automatically and also sent to other users.

Using the Main Menu to report a speed camera

1. Select the Main Menu button to open the Main Menu.

2. Select Report Speed Camera.

You see a message thanking you for reporting the camera.

Tip: If you make a mistake when reporting a camera, select Cancel in the message.

The speed camera is saved on your device automatically and also sent to other users.

Confirm or remove a mobile speed camera

You can confirm the presence of a mobile speed camera or remove a mobile speed camera if it is no longer present.

Just after you pass a mobile speed camera, in the route bar you are asked if the camera was still there.

- Select **Yes** if the mobile speed camera is still there.
- Select **No** if the mobile speed camera has been removed.

Your selection is sent to TomTom. We collect reports from many users to determine if the camera warning should be kept or removed.

Updating locations for cameras and hazards

The locations of speed cameras can change frequently. New cameras can also appear without warning and the locations for other hazards, such as accident blackspots, may also change.

When <u>connected to TomTom services</u>, all camera updates for fixed and mobile camera locations are received in real time. You do not need to do anything to receive updates – they are sent to your navigation app automatically.

Danger Zones

About danger zones and risk zones

The Danger Zones service warns you about danger zones and risk zones on your route when you are in France.

Since 3rd January 2012, it has been illegal to receive warnings about the position of fixed or mobile speed cameras when you are driving in France. To be compliant with this change in French law, speed camera locations are no longer reported but instead areas of danger are indicated as danger zones and risk zones.

Important: Outside of France, you receive warnings about speed cameras. Inside France, you receive warnings about danger zones and risk zones. When you cross the border, the type of warning you receive changes.

A danger zone is a zone specified by French law. A risk zone is a temporary danger zone reported by users. The Danger Zones service warns you about both danger zones and risk zones in the same way.

Danger zones and risk zones may or may not contain one or more speed cameras or a range of other driving hazards:

- Specific locations are not available and a danger zone icon is shown instead as you approach the zone.
- The minimum length of the zone depends on the road type and is 300 m for roads in built-up areas, 2000 m (2 km) for secondary roads and 4000 m (4 km) for motorways.
- The location of one or more speed cameras, if any, can be at any point within the zone.
- If two danger zones are close to each other, the warnings can be merged into a single longer zone.

Information about the location of zones is continually updated by TomTom and other users and frequently sent to the navigation app so that you always have the latest information. You can also contribute by reporting new risk zone locations.

The TomTom BRIDGE uses either a permanent connection or a smartphone connection to <u>connect to TomTom services</u>.

Important: If you are outside of the area covered by your mobile data plan, you may be liable for extra roaming charges while using TomTom Services.

Note: You cannot remove a danger zone or a risk zone.

Danger zone and risk zone warnings

Warnings are given 10 seconds before you reach a danger zone or risk zone. You are warned in several ways:

- A symbol is shown in the <u>route bar</u> and on your route on the map.
- Your distance to the start of the zone is shown in the route bar.
- The speed limit in the zone is shown in the route bar.
- You hear a warning sound as you get near the start of the zone.

- While you are approaching a zone or driving in a zone, your speed is monitored. If you drive
 more than 5 km/h or 3 mph over the speed limit the route bar turns red. If you drive less than
 5 km/h or 3 mph over the speed limit the route bar turns orange.
- While you are driving in a zone your distance to the end of the zone is shown in the route bar.

Symbol shown on
mapSymbol shown in
route barDescriptionImage: DescriptionImage: Descrip

Warning sounds are played for these types of zones:

You can change the way you are warned about danger and risk zones.

Changing the way you are warned

To change the way you are warned about danger zones, select **Sounds & Warnings** in the <u>Settings</u> menu.

You can then set how you want to be warned for the different types of zones. You can choose to be warned, warned only if you are speeding, or never warned.

To switch off all warnings, switch off **Danger zones & hazards**.

Reporting a risk zone

If you pass a new temporary risk zone that you were not warned about, you can report it instantly.

Note: To report a risk zone, your device must have a mobile data connection.

If a new temporary risk zone is reported directly before or after an existing risk or danger zone, then the new zone is added to the existing zone.

If enough Danger Zones users report a new risk zone, that zone may become a danger zone and be available for all subscribers.

You can report a risk zone in the following ways:

Note: Not all features are available on all apps.

Using the speed panel to report a risk zone

1. Select the risk zone symbol on the speed panel in the guidance view.

You see a message thanking you for reporting the zone.

Tip: If you make a mistake when reporting a camera, select **Cancel** in the message.

The risk zone is saved on your device automatically and also sent to other users.

Using the quick menu to report a risk zone

- 1. Select the current location symbol or the speed panel in the guidance view.
- 2. Select **Report Risk Zone** from the pop-up menu.

You see a message thanking you for reporting the risk zone.

Tip: If you make a mistake when reporting a risk zone, select Cancel in the message.

The risk zone is saved on your device automatically and also sent to other users. A reported risk zone stays on your device for three hours.

Using the Main Menu to report a risk zone

1. Select the Main Menu button to open the Main Menu.

2. Select Report Risk Zone.

You see a message thanking you for reporting the risk zone.

Tip: If you make a mistake when reporting a risk zone, select **Cancel** in the message.

The risk zone is saved on your device automatically and also sent to other users. A reported risk zone stays on your device for three hours.

Updating locations for danger zones and risk zones

The locations of danger zones and risk zones can change frequently. New zones can also appear without warning.

When <u>connected to TomTom services</u>, all zone updates are received in real time. You do not need to do anything to receive updates – they are sent to your navigation app automatically.

My Places

About My Places

My Places provides an easy way to select a location without the need to search for the location each time. You can use My Places to create a collection of useful or favourite addresses.

Tip: The terms "favourite" and "place" mean the same thing - favourites are places that you go to often.

The following items are always in My Places:

- **Home** Your home location can be your home address or somewhere you often visit. This feature provides an easy way to navigate there.
- Work Your work location can be your workplace address or somewhere you visit often. This feature provides an easy way to navigate there.
- **Recent destinations** Select this button to select your destination from a list of locations you have recently used as destinations. These also include your stops.

You can add a location to My Places directly in <u>My Places</u>, by <u>selecting a location</u> from the map, or by <u>searching for a location</u>.

Your home location, work location, and the locations that you have added appear in a list in My Places and are shown with a marker on the <u>map</u>.

Setting your home or work location

You can set your home or work locations in the following ways:

Setting your home or work location using My Places

- 1. In the Main Menu, select My Places.
- 2. Select Add Home or Add Work.

Tip: To set your home location, you can also select Add Home from the main menu.

3. To select a location for home or work, do one of the following:

- Zoom in on the map at the location you want to select. Press and hold to select the location, then select **Set**.
- Select the Search button and search for a location. Select a location to set as home or work, then select Set.

Setting your home or work location using the map

- 1. In the Map View, move the map and zoom in until you can see your home or work location.
- Press and hold to select the location.
 A pop-up menu shows the nearest address.
- 1. Open the pop-up menu and select **Add to My Places**.
- 2. In the name bar, enter the name "Home" or "Work".

Note: "Home" must have a capital letter H and "Work" must have a capital letter W.

3. Save the location.

Your home or work location is shown on the map.

Changing your home location

You can change your home location in the following ways.

Changing your home location using My Places

- 1. In the Main Menu, select My Places.
- 2. Select Home.

Your home location is shown on the map, with a pop-up menu.

3. Select Edit Location.

- 4. To select a new home location, do one of the following:
 - Zoom in on the map at the location you want to select. Press and hold to select the location, then select the home location symbol.
 - Select the **Search** button and search for a location. Select a location to set as home. Select **Set home location**.

Changing your home location using the map

- 1. In the Map View, move the map and zoom in until you can see your new home location.
- Select the location by pressing and holding the screen for about one second.
 A pop-up menu shows the nearest address.
- 1. Open the pop-up menu and select **Add to My Places**.
- 2. In the name bar, enter the name "Home".

Note: "Home" must have a capital letter H.

3. Select Add.

Your home location is changed to the new location.

Adding a location from My Places

- 1. In the Main Menu, select My Places.
- 2. Select Add a new place.
- 3. To select a location, do one of the following:
 - Zoom in on the map at the location you want to select. Press and hold to select the location, then select the add location symbol.
 - Search for a location. Select **Show on Map**, then select the add location symbol.

The name of the location appears in the edit screen.

- 4. Edit the name of the location so you can easily recognise it.
- 5. Select **Done** to save your location in the My Places list.

Add a location to My Places from the map

- 1. Move the map and zoom in until you can see the destination that you want to navigate to.
- 2. Press and hold to select the location.

3. Select the pop-up menu button.

4. Select Add to My Places.

The name of the location is shown in the edit screen.

- 5. Edit the name of the location so you can easily recognise it.
- Select **Done** to save your location in the My Places list.
 The location you added is shown with a marker on the map.

Adding a location to My Places using search

- 1. Search for a location.
- 2. Select the location then select **Show on map**.
- 3. When the map view shows the location, select the pop-up menu button.

4. Select Add to My Places.

The name of the location appears in the edit screen.

- 5. Edit the name of the location so you can easily recognise it.
- 6. Select **Done** to save your location in the My Places list.

Deleting a recent destination from My Places

- 1. In the Main Menu, select My Places.
- 2. Select Recent Destinations.
- 3. Select Edit List.
- 4. Select the destinations you want to delete.
- 5. Select Delete.

Deleting a location from My Places

- 1. In the Main Menu, select My Places.
- 2. Select Edit List.
- 3. Select the locations you want to delete.
- 4. Select Delete.

Importing a POI list

You can find collections of POIs on the Internet and upload these POI collections to <u>My Places</u> by <u>transferring the files to your device</u>. A POI collection might contain, for example, campsites or restaurants for the area you are travelling in, and provides an easy way to select a location without the need to search for the location each time.

Your TomTom BRIDGE uses .OV2 files for POI collections.

To import an .OV2 file to your TomTom BRIDGE, do the following steps:

1. Connect the TomTom BRIDGE to your computer using the USB cable supplied with your device, then switch your device on.

Note: Use ONLY the USB cable supplied with your device. Other USB cables may not work. **Note**: You cannot use the mount to connect your device to your computer.

Note: You should plug the USB cable directly into a USB port on your computer and not into a USB hub or USB port on a keyboard or monitor.

2. On your computer, open a file manager program.

Your device appears in your computer's files system as TomTom Bridge.

- 3. Open your device's Internal Storage folder, then open the Locations folder.
- 4. Copy the .OV2 files from your computer to the Locations folder.

The .OV2 file is imported and you see the message **New place list added**.

Tip: If your .OV2 file also has an associated icon file, you can also copy that file to the Locations folder. The icon file is used for the POI location pins on the map.

- Select My Places in the Main Menu.
 Your new POI list is shown in the Places list.
- 6. Select your new POI list.

Your new POI list opens showing all the POIs in the list. Select the map view to see the POIs on the map.
Settings

My Vehicle

Important: Route planning for a specific vehicle type is available only when a truck map is installed. If a truck map is not installed, a car route is planned instead.

Select Settings in the Main Menu, then select My Vehicle.

On this screen, you can set your vehicle type and dimensions.

Routes planned by your device avoid restrictions for the vehicle type, and take into account the vehicle's specifications.

Vehicle Type

Select this setting to choose your vehicle type. When you select your vehicle, the following details for your vehicle are shown:

- Dimensions (Length/Width/Height)
- Weights (Gross/Axle)
- Max. speed

For vehicle types Car and Van, the dimensions, weights and maximum speed are set to zero. To change a setting, select it and enter a value that is specific to your vehicle. You can also leave a setting at zero so it will not be used to determine restrictions when a route is planned.

For vehicle types Bus and Truck, pre-set dimensions, weights and maximum speed are shown. To change a setting, select it and enter a value that is specific to your vehicle.

Important: Settings that are set at zero are not used to determine restrictions when a route is planned.

HAZMAT

If your vehicle type is Truck and you are transporting hazardous materials, select this setting to choose the type of hazardous material.

Appearance

Select Settings in the Main Menu, then select Appearance.

On this screen, you can change these settings:

Display

Select Display to change the appearance of the display.

Route bar

Select Route bar to change the information you see in the route bar.

Guidance view

Select <u>Guidance view</u> to change the information you see in the guidance view.

Automatic zoom

Select <u>Automatic Zoom</u> to change how you view a junction as you drive.

Automatic map view switching

By default, automatic changing of views is on. This means, for example, that your TomTom BRIDGE shows the map view when an alternative route is being suggested, along with several other sets of circumstances. Also, for example, that your TomTom BRIDGE shows the guidance view when you start driving and you start to accelerate. Select this setting if you want to turn off automatic changing between guidance view and map view.

Show previews of motorway exits

Select this setting to control the full screen preview when you approach motorway exits.

Display

Select **Switch to night colours when dark** to automatically switch to night colours when it gets dark.

Route Bar

In Route Bar you can change these settings:

Tip: To find out where the different panels are in the guidance view or map view, see <u>What's on</u> <u>the screen</u>.

Select Arrival information to change the information shown in the arrival information panel:

- Show remaining distance
 Select this setting to show the remaining distance left to travel.
- Show remaining time

Select this setting to show the remaining time left to travel.

Switch between distance and time automatically

Select this setting to continuously switch between remaining distance and remaining time.

Show arrival information for

Select this setting to show the arrival time for your final destination or your next stop.

Select **Route information** to choose the POIs and route information you want to see in the route bar.

Select **Show current time** to show the current time at the bottom of the route bar.

Show wide route bar if possible

The wide route bar is not shown by default. You can select this setting to switch on the wide route bar in the guidance view.

Note: The wide route bar can only be shown if the screen is wide enough.

When the wide route bar is shown, you see more information about your route. For example, you see time and distance to traffic queues and more.

Guidance view

In Guidance view you can change these settings:

Show current street name

This setting displays name of the street you are driving along.

Guidance view style

Select this setting to choose from 3D or 2D versions of the guidance view. Both the 2D and 3D guidance views move in your direction of travel.

Automatic Zoom

Select **Automatic zoom** to change settings for the automatic zoom in Guidance view when you approach a turn or a junction. Zooming in can make the turn or junction easier to drive.

Zoom in to next turn

All the turns and junctions on your route are shown zoomed in to the maximum level.

Based on road type

The turns and junctions on your route are shown zoomed in to the standard level for the type of road you are on.

None

None of the turns and junctions on your route are shown zoomed in.

Voices

Select Settings in the Main Menu, then select Voices.

Choosing a voice

Select **Choose a voice** to change the voice that gives spoken directions and other route instructions.

A wide range of voices are available. There are computer voices which can read street names and other information directly from the map and there are recorded voices which have been recorded by actors.

Note: Computer voices are not available in all languages.

If you need a computer voice and your language is unavailable, then you are asked to choose from a list of installed computer voices available for the country you are in.

Instruction settings

Read aloud arrival time

Use this setting to control whether your arrival time is read aloud.

Read aloud early instructions

For example, if you switch on this setting, you could hear early instructions such as "After 2 km take the exit right" or "Ahead, turn left".

Note: When a recorded voice is chosen, you see only this setting because recorded voices cannot read out road numbers, road signs, etc.

Read aloud road numbers

Use this setting to control whether road numbers are read aloud as part of navigation instructions. For example, when road numbers are read aloud, you hear "Turn left onto A100".

Read aloud road sign information

 Use this setting to control whether road sign information is read aloud as part of navigation instructions. For example, "Turn left onto A302 Bridge Street towards Islington."

Read aloud street names

Use this setting to control whether street names are read aloud as part of navigation instructions. For example, when street names are read aloud, you hear "Turn left Graham Road towards Hackney."

Read aloud foreign street names

Use this setting to control whether foreign street names are read aloud as part of navigation instructions, such as "Turn right onto Champs Élysées". For example, an English computer voice can read and pronounce French street names but pronunciation may not be completely accurate.

Advanced

Audio output channel

Select which channel you want to use to play sounds.

Maps

Select Settings in the Main Menu, then select Maps.

Maps are divided into maps areas, and each area can be updated separately. Map areas can be updated when the TomTom BRIDGE is connected to Wi-Fi. If permitted by the system administrator, you can also update map areas when the TomTom BRIDGE is connected to a <u>permanent or</u> <u>smartphone connection</u>.

A map update updates ONLY the following map data:

- Speed limits.
- Direction of traffic flow.
- Allowable manoeuvres at intersections.
- Status of road closures due to reopen.

Note: The maps and map areas are selected by the system administrator. You cannot remove or add maps or map areas. If a map area is missing, contact your system administrator.

Manually updating a map area

When an update is available for a map area, the **Update** button is shown next to the map area. The size of the update is also shown. Tap the **Update** button to download and install the update. When a map area has been updated, **Up to date** is shown next to the map area.

To update all map areas at the same time, tap the **Update All** button.

Important: All map updates together can be a large amount of data and can take a long time to download. To prevent high data charges we advise you to download these updates using a Wi-Fi connection.

Automatically updating a map area

To update a map area when a new update becomes available, tap the **Automatic Update** button. Select the map areas that you want to automatically update. The updates will automatically download and install when they are released. When a map area has been updated, **Up to date** is shown next to the map area.

Route Planning

Select Settings in the Main Menu, then select Route Planning.

When a faster route is available

If a faster route found while you are driving, TomTom Traffic can replan your journey to use the faster route. Select from the following options:

- Always take the fastest route
- Ask me so I can choose you will be asked if you want to take the faster route. You can manually select the faster route or you can select the route by steering towards it.
- Don't ask me

Always plan this type of route

The types of route you can choose from are as follows:

- **Fastest route** the route which takes the least time.
- **Shortest route** the shortest distance between the locations you set. This may not be the quickest route, especially if the shortest route is through a town or city.
- Most eco-friendly route the most fuel-efficient route for your journey.
- Avoid motorways this type of route avoids all motorways.

Avoid on every route

You can choose to avoid ferries and car shuttle trains, toll roads, carpool lanes, and unpaved roads. Set how your TomTom BRIDGE should manage each of these road features when the device calculates a route.

Carpool lanes are sometimes known as High Occupancy Vehicle Lanes (HOV) and are not present in every country. To travel on these lanes, you may need to have more than one person in the car, for example, or the car may need to use environmentally-friendly fuel.

Sounds and Warnings

Select Settings in the Main Menu, then select Sounds & Warnings.

On this screen, you can change sound and warning settings.

Warning type

You can choose how you want to be warned:

Read aloud

Hear spoken warnings and warnings sounds.

Sounds

Hear only warning sounds.

Visual only

No warning sounds are given.

Warnings

You can set how you want to be warned for different types of cameras, danger zones and safety hazards. You can choose to be always warned, warned only if you are speeding, or never warned.

Speed cameras & hazards

You can choose to switch off all speed camera, danger zone and hazard warnings. When **Speed Cameras & hazards** is switched on, you can switch off the warnings for each type of speed camera, danger zone and hazard.

Additional settings

Traffic jam ahead

Traffic jam warnings in the route bar are part of <u>TomTom Traffic</u>. You can choose never to be warned or to always be warned when approaching a jam too quickly.

When speeding

This warning is given as soon as you exceed the speed limit by more than 5 km/h or 3 mph. When you are speeding, the speed panel also turns red in the guidance view.

Read aloud traffic warnings

Switch on **Read aloud traffic warnings** to hear spoken warnings about traffic on your route.

Units

Select Settings in the Main Menu, then select Units.

On this screen, you can change the following settings:

Distance

Select this setting to choose the units used on your device for features such as route planning. If you want the units to be set to those used in your current location, select **Automatic**.

Language

The language used on the TomTom BRIDGE is also used on the apps installed on the device. For example, the language used for buttons and menus in the navigation app is the same as the language you selected in your device settings.

You can change the device language in Language & input in the TomTom BRIDGE Settings app.

If you change the device language, the voice used for spoken directions and other route instructions in the navigation app might not be compatible with the new device language. Go to Voices in the Settings menu and download a compatible voice.

Important: Some voices are large files that can take a long time to download. To prevent high data charges we advise you to download a voice using a Wi-Fi connection.

Getting Help

Help

Select Help from the Main Menu or the Settings menu.

On this screen, you can see the following information:

About

This is an information screen rather than a setting and shows you information about your TomTom BRIDGE.

External Camera App

Using the External Camera app

This section explains how to use the External Camera app.

Important: For other settings and operation instructions for the TomTom BRIDGE, and for instructions about other apps installed on the TomTom BRIDGE, please refer to the applicable User Documentation.

The app shows you the live image from the external camera installed on your vehicle.

Note: A rear-view camera usually switches on when you select reverse gear. Other external cameras are switched on by a switch on the vehicle dashboard. The app will not work unless it receives a signal from the camera.

Select the **External camera** button to start the app. The image from the camera appears automatically.

On some devices the camera image is shown in a widget on the home screen. Select the widget to show the camera image full-screen.

Camera settings

Select the settings button in the Rear view camera screen.

Note: The TomTom BRIDGE might be secured to prevent you making changes.

On this screen, you can change these settings:

Image position

Fit

This setting zooms out so either the image height or width fills the screen size, whichever is larger. You will see the complete image, but the image might have a border on two sides.

• Fill

This setting zooms in on the image so it fills the whole screen. A part of the image might be missing from the screen.

Stretch

This setting fits both the height and width to the screen. The image might appear distorted.

Aspect ratio

The aspect ratio is the ratio of the screen width to the screen height. If your camera automatically sets the aspect ratio, select **Auto**. If your camera does not set the aspect ratio, select the setting that gives the best screen image size.

Full screen

Select this setting to show the image on the full screen. The <u>system bar</u> automatically hides after a few seconds. Touch the screen to show the system bar again.

Mirror image

Some cameras can automatically mirror the image to make it usable as a rear-view image. If your camera does not mirror the image, select this setting to mirror the screen image.

Guide lines

Select Guide lines to show guide lines on the camera screen.

Using the vehicle width guide lines

About the vehicle width guide lines

The guide lines help you see if your vehicle will fit in a parking space or other width-restricted area. Once you have set-up the guide lines using a space that you know your vehicle will fit in, you can use the guide lines to check the size of other spaces.

Setting up the vehicle width guide lines

- 1. Open the camera app.
- 2. Position your vehicle in front of a space that you know your vehicle will fit in to. Make sure that your vehicle is in line with the centre of the space.

 Switch on Guide lines in the <u>camera settings</u>. The guide lines are shown on the screen.

- 4. Touch and hold the guide lines until you see the hand symbol.
- 5. Drag each corner of the guide line frame to fit the space. Drag the hand symbol to move the whole guide line frame.
- 6. When the guide line frame fits the space, touch the screen outside of the frame to save the setting.

Tip: You can hide the guide lines by switching off Guide lines in the camera settings.

Using the vehicle width guide lines

- 1. Open the camera app.
- 2. Switch on **Guide lines** in the <u>camera settings</u>.
- 3. Position your vehicle in front of a parking space. Use the guide lines to see if your vehicle can fit in the parking space. If the guide lines fit inside the parking lines then your vehicle will probably fit in the parking space.

Important: While reversing, also be aware of other obstructions, for example adjacent vehicles or overhead obstacles.

TomTom Music App

Using the TomTom Music app

This section explains how to use the TomTom Music app.

Important: For other settings and operation instructions for the TomTom BRIDGE, and for instructions about other apps installed on the TomTom BRIDGE, please refer to the applicable User Documentation.

Use the Music app to select and play music <u>stored in the device's internal memory</u>, or on the memory card that you have inserted in the TomTom BRIDGE.

Depending on the TomTom BRIDGE configuration, the music app can be started from one of the following places on your TomTom BRIDGE:

• The Music app widget on the home screen.

• The **Music** button in the apps screen.

The app automatically finds your music on the device and on the memory card. The tracks are played in a random order. You can select a music track using the next and previous buttons. Select the play button to play the track.

The album image is shown if it is available.

The music tracks continue to play even when you are using other apps. Adjust the music volume using the volume control in the <u>system bar</u>.

Addendum and Copyright (TomTom BRIDGE Terminal)

Important Safety Notices and Warnings

Global Positioning System (GPS) and Global Navigation Satellite System (GLONASS)

The Global Positioning System (GPS) and Global Navigation Satellite System (GLONASS) systems are satellite-based systems that provide location and timing information around the globe. GPS is operated and controlled by the Government of the United States of America, which is solely responsible for its availability and accuracy. GLONASS is operated and controlled by the Government of Russia, which is solely responsible for its availability and accuracy. Changes in GPS or GLONASS availability and accuracy, or in environmental conditions, may impact the operation of this device. TomTom disclaims any liability for the availability and accuracy of GPS or GLONASS.

Safety messages

Important! Read before use!

Death or serious injury could result from failure or partial failure to follow these warnings and instructions. Failure to properly set up, use, and care for this device can increase the risk of serious injury or death, or damage to the device.

Use with care warning

It is your responsibility to use best judgment, due care and attention when using this device. Don't allow interaction with this device to distract you while driving. Minimise the time spent looking at the device screen while driving. You are responsible for observing laws that limit or prohibit the use of mobile phones or other electronic devices, for example, the requirement to use hands-free options for making calls when driving. **Always obey applicable laws and road signs, especially those relating to your vehicle's dimensions, weight and payload type.** TomTom does not guarantee the error-free operation of this device nor the accuracy of route suggestions provided and shall not be liable for any penalties arising from your failure to comply with applicable laws and regulations.

Notice for oversized/commercial vehicles

Devices without a truck map installed will not provide appropriate routes for oversized/commercial vehicles. If your vehicle is subject to weight, dimension, speed, route, or other restrictions on a public road then you must only use a device that has a truck map installed. Your vehicle specifications must be entered accurately on the device. Use this device as a navigation aid only. Do not follow navigation instructions which may put you or other road users in danger. TomTom accepts no liability for damages resulting from your failure to observe this notice.

Proper mounting

Do not mount the device in a way that may obstruct your view of the road or your ability to control the vehicle. Do not place the device in an area that may obstruct the deployment of an airbag or of any other safety feature of your vehicle.

Pacemakers

Pacemaker manufacturers recommend that a minimum of 15cm / 6 inches be maintained between a handheld wireless device and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with independent research and recommendations by Wireless Technology Research.

Guidelines for people with pacemakers:

- You should ALWAYS keep the device more than 15cm / 6 inches from your pacemaker.
- You should not carry the device in a breast pocket.

Other medical devices

Please consult your physician or the manufacturer of the medical device, to determine if the operation of your wireless product may interfere with the medical device.

Device care

It is important to take care of your device:

Except for using the SIM card slot, do not open the casing of your device under any circumstances. Doing so may be dangerous and will invalidate the warranty.

Wipe or dry the screen of your device using a soft cloth. Do not use any liquid cleaners.

Rating: DC5V, 2.0A

How TomTom uses your information

Information regarding the use of personal information can be found at: tomtom.com/privacy.

Environmental and Battery information

Your device

Do not disassemble, crush, bend, deform, puncture, or shred your device. Do not use it in a humid, wet and/or corrosive environment. Do not put, store or leave the device in a high temperature location, in direct sunlight, in or near a heat source, in a microwave oven or in a pressurised container, and do not expose it to temperatures over 60°C (140°F) or below -20°C (-4°F).

Avoid dropping the device. If the device is dropped and you suspect damage, please contact customer support. Use the device only with the chargers, mounts or USB cables provided. For TomTom approved replacements, go to tomtom.com.

Operating temperature

This device will remain fully operational within the temperature range -4°F / -20°C to 140°F / 60°C. Prolonged exposure to higher or lower temperatures can cause damage to your device and is therefore advised against.

Long period storage: -4°F / -20°C to 95°F / 35°C.

Important: Before you switch on the device, let the device acclimatise to the standard operation temperature range for at least 1 hour. Do not use the device outside of this temperature range.

Device battery (Non-replaceable)

This product contains a lithium polymer battery.

Do not modify or re-manufacture the battery. Do not attempt to insert foreign objects into the battery, or immerse or expose to water or other liquids. Do not expose the battery to fire, explosion or other hazard.

Do not short circuit a battery or allow metallic conductive objects to contact battery terminals.

Do not attempt to replace or remove the battery yourself unless the user manual clearly indicates that the battery is user replaceable. For TomTom BRIDGE, a qualified professional should remove the battery.

User replaceable batteries must only be used in systems for which they are specified.

Caution: Risk of explosion if the battery is replaced by an incorrect type.

If you have a problem with the battery, please contact TomTom Customer Support.

The stated battery life is the maximum possible battery life which is based on an average usage profile and can only be achieved under specific atmospheric conditions. To prolong the battery life, keep the device in a cool, dry place and follow the tips specified in this FAQ: tomtom.com/batterytips. Charging will not occur at temperatures below 32°F / 0°C or over 140°F / 60°C.

Failure to follow these guidelines may cause the battery to leak acid, become hot, explode or ignite and cause injury and/or damage. Do not attempt to pierce, open or disassemble the battery. If the battery leaks and you come into contact with the leaked fluids, rinse thoroughly with water and seek medical attention immediately.

Battery waste disposal

THIS BATTERY MUST BE RECYCLED OR DISPOSED OF ACCORDING TO LOCAL LAWS AND REGULATIONS AND ALWAYS BE KEPT SEPARATE FROM HOUSEHOLD WASTE. THIS HELPS PRESERVE THE ENVIRONMENT.

CE mark and RED text for TomTom BRIDGE

CE

This device can be used in all EU Member States. The frequency bands and the maximum radio frequency emission power in which this device operates are as follows:

Model	Near field communi- cation (NFC)	Maximum radio frequency emission power (dBm)	Frequency band (Bluetooth) (MHz)	Maximum radio frequency emission power (dBm)	Frequency band (Wi-Fi) (MHz)	Maximum radio frequency emission power (dBm)
4F176	13.56	11.56	2402 - 2480	2.66	2412 – 2472, 5150 – 5350, 5470 – 5725	17.06

4FI722	Not used	Not used	2402 - 2480	2.66	2412 – 2472,	17.06
					5150 - 5350,	
					5470 - 5725	

Model	Frequency band (GPRS 900) (MHz)	Maximum radio frequency emission power (dBm)	Frequency band (GPRS 1800) (MHz)	Maximum radio frequency emission power (dBm)	Wide Band Code Division Multiple Access (WCMDA)(MHz)	Maximum radio frequency emission power (dBm)
4FI76	880.2 - 914.8	33	1710.2 - 1784.8	30	882.4 – 912.6, 1922.4 - 1977.6	24
4FI722	Not used	Not used	Not used	Not used	Not used	Not used

Hereby, TomTom declares that the radio equipment type TomTom BRIDGE GPS Navigation system is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address:

http://www.tomtom.com/en_gb/legal/declaration-of-conformity/

Requirements in

AT/BE/BG/CZ/DK/EE/FR/DE/IS/IE/IT/EL/ES/CY/LV/LI/LT/LU/HU/MT/NL/NO/PL/PT/RO/SI/SK/TR/FI/SE/ CH/UK/HR. 5150MHz~5350MHz is for indoor use only.

Important: TomTom fully controls all software and firmware updates that (may) impact the compliance of this device with Directive 2014/53/EU. Customers should not attempt to make any software or firmware changes which (may) impact the compliance of this device with Directive 2014/53/EU.

4FI70, 4FI72,4FI73 model names correspond to devices which have reached their end of life. Product support and software updates for those devices are still available but these devices are no longer actively produced or sold in the EU/EEA. Therefore, none of these devices have been re-certified under Directive 2014/53/EU.

WEEE – e-waste disposal

In the EU/EEA, this product is marked with the wheelie bin symbol on its body and/or packaging as required by Directive 2012/19/EU (WEEE). This product shall not be treated as household waste or be disposed of as unsorted municipal waste. You can dispose of this product by returning it to the point of sale or bringing it to your local municipal collection point for recycling.

Outside of the EU/EEA, the wheelie bin symbol may not have the same meaning. More information about national recycling options can be requested from a responsible local authority. It is the responsibility of the end user to comply with local law when disposing of this product.

Triman logo

Connected networks

Devices sold in the European Union that contain a GSM module are intended for connection to the following networks:

GSM/GPRS 900/1800

WCDMA 2100/900

EU Specific Absorption Rate (SAR) compliance

THIS WIRELESS DEVICE MODEL MEETS GOVERNMENT REQUIREMENTS FOR EXPOSURE TO RADIO WAVES WHEN USED AS DIRECTED IN THIS SECTION

This GPS Navigation System is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Council of the European Union.

The SAR limit recommended by The Council of the European Union is 2.0W/kg averaged over 10 grams of tissue for the body (4.0 W/kg averaged over 10 grams of tissue for the extremities - hands, wrists, ankles and feet). Tests for SAR are conducted using standard operating positions specified by the EU council with the device transmitting at its highest certified power level in all tested frequency bands.

Exposure limits

This device complies with radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the radio frequency exposure limits, human proximity to the antenna shall not be less than 20 cm (8 inches) during normal operation.

Limites d'exposition

Cet équipement est conforme aux limites d'exposition aux rayonnements définies pour un environnement non contrôlé. Afin d'éviter tout dépassement potentiel des limites d'exposition aux frèquences radio, tout être humain doit rester éloigné d'au moins 20cm (8 puces) de l'antenne dans le cadre d'un fonctionnement normal.

Certification information for the user

To see the product certification information for your device, do the following:

- 1. Select **Settings** in the Main Menu.
- 2. Select About your TomTom device.
- 3. Select Certificates.

Certification for South Africa

This product model number 4FI76 displays the ICASA logo to show it complies with all relevant South African radio equipment certifications.

Certification for Australia

This product displays the Regulatory Compliance Mark (RCM) to show that it complies with relevant Australian regulations.

Warning for Australia

The user needs to switch off the device when exposed to areas with potentially explosive atmospheres such as petrol stations, chemical storage depots and blasting operations.

Certification for New Zealand

This product displays R-NZ to show it complies with relevant New Zealand regulations.

Important Safety Notices and Warnings

Global Positioning System (GPS) and Global Navigation Satellite System (GLONASS)

The Global Positioning System (GPS) and Global Navigation Satellite System (GLONASS) systems are satellite-based systems that provide location and timing information around the globe. GPS is operated and controlled by the Government of the United States of America, which is solely responsible for its availability and accuracy. GLONASS is operated and controlled by the Government of Russia, which is solely responsible for its availability and accuracy. Changes in GPS or GLONASS availability and accuracy, or in environmental conditions, may impact the operation of this device. TomTom disclaims any liability for the availability and accuracy of GPS or GLONASS.

Safety messages

Important! Read before use!

Death or serious injury could result from failure or partial failure to follow these warnings and instructions. Failure to properly set up, use, and care for this device can increase the risk of serious injury or death, or damage to the device.

Use with care warning

It is your responsibility to use best judgment, due care and attention when using this device. Don't allow interaction with this device to distract you while driving. Minimise the time spent looking at the device screen while driving. You are responsible for observing laws that limit or prohibit the use of mobile phones or other electronic devices, for example, the requirement to use hands-free options for making calls when driving. **Always obey applicable laws and road signs, especially those relating to your vehicle's dimensions, weight and payload type**. TomTom does not guarantee the error-free operation of this device nor the accuracy of route suggestions provided and shall not be liable for any penalties arising from your failure to comply with applicable laws and regulations.

Notice for oversized/commercial vehicles

Devices without a truck map installed will not provide appropriate routes for oversized/commercial vehicles. If your vehicle is subject to weight, dimension, speed, route, or other restrictions on a public road then you must only use a device that has a truck map installed. Your vehicle specifications must be entered accurately on the device. Use this device as a navigation aid only. Do not follow navigation instructions which may put you or other road users in danger. TomTom accepts no liability for damages resulting from your failure to observe this notice.

Proper mounting

Do not mount the device in a way that may obstruct your view of the road or your ability to control the vehicle. Do not place the device in an area that may obstruct the deployment of an airbag or of any other safety feature of your vehicle. Always ensure that the device is securely installed/mounted before use. This helps prevent it from becoming loose and/or falling off.

Pacemakers

Pacemaker manufacturers recommend that a minimum of 15cm / 6 inches be maintained between a handheld wireless device and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with independent research and recommendations by Wireless Technology Research.

Guidelines for people with pacemakers:

- You should ALWAYS keep the device more than 15cm / 6 inches from your pacemaker.
- You should not carry the device in a breast pocket.

Other medical devices

Please consult your physician or the manufacturer of the medical device, to determine if the operation of your wireless product may interfere with the medical device.

ISO7637

ISO7637 pulse 1 represents the negative voltage transient produced during switching of a higher current inductive load that shares the same circuit with TomTom BRIDGE. Pulse 2b simulates transients from D.C. motors acting as generators after the ignition is switched off. In practice such pulses very seldom occur. The TomTom BRIDGE will reboot due to the pulse and return to normal operation afterwards.

Device care

It is important to take care of your device:

- The TomTom BRIDGE device must be used within the recommended operating temperature ranges only.
- The device housing must not be compromised or damaged, please use the recommended mounting interfaces as stated in the instruction manual.
- Wipe or dry the device using a soft cloth. Do not use any liquid cleaners.
- The device is resistant to dust and dripping water (IP52) if stored, used and mounted correctly.
- Do not immerse in water or use the device outdoors.
- Failure to follow these instructions may impact the device performance and useful lifetime.

Rating: DC5V, 2.0A

How TomTom uses your information

Information regarding the use of personal information can be found at: tomtom.com/privacy.

Environmental information

Your device

Do not disassemble, crush, bend, deform, puncture, or shred your device. Do not use it in a humid, wet and/or corrosive environment. Do not put, store or leave the device in a high temperature location, in direct sunlight, in or near a heat source, in a microwave oven or in a pressurised container, and do not expose it to temperatures over 60°C (140°F) or below -20°C (-4°F).

Avoid dropping the device. If the device is dropped and you suspect damage, please contact customer support. Use the device only with the chargers, mounts or USB cables provided. For TomTom approved replacements, go to tomtom.com.

Operating temperature

This device will remain fully operational within the temperature range $-4^{\circ}F / -20^{\circ}C$ to $140^{\circ}F / 60^{\circ}C$. Prolonged exposure to higher or lower temperatures can cause damage to your device and is therefore advised against.

Long period storage: -4°F / -20°C to 95°F / 35°C.

Important: Before you switch on the device, let the device acclimatise to the standard operation temperature range for at least 1 hour. Do not use the device outside of this temperature range.

CE mark and RED text for TomTom BRIDGE Hub

CE

This device can be used in all EU Member States. The frequency bands and the maximum radio frequency emission power in which this device operates are as follows:

Model	Frequency band (Bluetooth) (MHz)	Maximum radio frequency emission power (dBm)	Frequency band (WiFi) (MHz)	Maximum radio frequency emission power (dBm)	Frequency band (GPRS 900) (MHz)	Maximum radio frequency emission power (dBm)	Frequency band (GPRS 1800) (MHz)	Maximum radio frequency emission power (dBm)
4FIC00	2402 - 2480	3.5	2412 – 2484, 5150 – 5350, 5470 – 5725	18.5, 17.5, 17.5	Not used	Not used	Not used	Not used
4FIC0 / 4FIC01	2402 - 2480	3.5	2412 – 2484, 5150 - 5350, 5470 - 5725	18.5, 17.5, 17.5	880 - 914	37.5	1710 - 1785	34.0

Model	LTE Band 1 (MHz)	Maximum radio frequency emission power (dBm)	LTE Band 3 (MHz)	Maximum radio frequency emission power (dBm)	LTE Band 8 (MHz)	Maximum radio frequency emission power (dBm)	LTE Band 20 (MHz)	Maximum radio frequency emission power (dBm)
4FIC00	Not used	Not used	Not used	Not used	Not used	Not used	Not used	Not used
4FIC0 / 4FIC01	1925 - 1975	25.6	1715 - 1780	25.6	885 - 910	25.5	837 - 857	25.5

Hereby, TomTom declares that the radio equipment type TomTom BRIDGE GPS Navigation system is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: http://www.tomtom.com/en_gb/legal/declaration-of-conformity/

Requirements in

AT/BE/BG/CZ/DK/EE/FR/DE/IS/IE/IT/EL/ES/CY/LV/LI/LT/LU/HU/MT/NL/NO/PL/PT/RO/SI/SK/TR/FI/SE/ CH/UK/HR. The device for operation in the band 5150MHz~5350MHz is for indoor use only.

Important: TomTom fully controls all software and firmware updates that (may) impact the compliance of this device with Directive 2014/53/EU. Customers should not attempt to make any software or firmware changes which (may) impact the compliance of this device with Directive 2014/53/EU.

WEEE – e-waste disposal

In the EU/EEA, this product is marked with the wheelie bin symbol on its body and/or packaging as required by Directive 2012/19/EU (WEEE). This product shall not be treated as household waste or be disposed of as unsorted municipal waste. You can dispose of this product by returning it to the point of sale or bringing it to your local municipal collection point for recycling.

Outside of the EU/EEA, the wheelie bin symbol may not have the same meaning. More information about national recycling options can be requested from a responsible local authority. It is the responsibility of the end user to comply with local law when disposing of this product.

Triman logo

Connected networks

Devices sold in the European Union that contain a GSM module are intended for connection to the following networks:

GSM/GPRS 900/1800

LTE 800 (Bd 20) / 900 (Bd 8) / 1800 (Bd 3) / 2100 MHz (Bd 1)

EU Specific Absorption Rate (SAR) compliance

THIS WIRELESS DEVICE MODEL MEETS GOVERNMENT REQUIREMENTS FOR EXPOSURE TO RADIO WAVES WHEN USED AS DIRECTED IN THIS SECTION

This GPS Navigation System is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Council of the European Union.

The SAR limit recommended by The Council of the European Union is 2.0W/kg averaged over 10 grams of tissue for the body (4.0 W/kg averaged over 10 grams of tissue for the extremities - hands, wrists, ankles and feet). Tests for SAR are conducted using standard operating positions specified by the EU council with the device transmitting at its highest certified power level in all tested frequency bands.

Exposure limits

This device complies with radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the radio frequency exposure limits, human proximity to the antenna shall not be less than 20 cm (8 inches) during normal operation. For the external antenna (LTE-main) the gain should be limited to a maximum of 2.1dBi.

Certification information for the user

To see the product certification information for your device, do the following:

- 1. Select **Settings** in the Main Menu.
- 2. Select About your TomTom device.
- 3. Select Certificates.

Certification for Australia

This product displays the Regulatory Compliance Mark (RCM) to show that it complies with relevant Australian regulations.

Warning for Australia

The user needs to switch off the device when exposed to areas with potentially explosive atmospheres such as petrol stations, chemical storage depots and blasting operations.

Certification for New Zealand

This product displays R-NZ to show it complies with relevant New Zealand regulations.
